MINT **ERROR** NEWSTM MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our fifth year bringing you both a print magazine and an online PDF magazine. There are now over 450 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Mintererrornews.com has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Mint Error News was originally sponsored by Mike Byers and ANACS. Due to the popularity of mint errors and the magazine it is now sponsored by Mike Byers and several other mint error dealers including Allan Levy (alscoins.com) and Fred Weinberg (fredweinberg.com). Mike Byers is the Publisher and Editor of Mint Error News Magazine.

Mike Byers (mikebyers.com) has been a Professional Numismatist since 1978. He is the largest dealer of the world's rarest mint errors. He handles the world's finest major mint errors and numismatic rarities. He specializes in U.S. and World Major Mint Errors and Die Trials. His new discoveries of major mint errors have been front page news for years. He is a life member of ANA since 1985, a charter member of NGC and a featured dealer/member of PCGS. He is a founder member of the California Coin & Precious Metals Association. He is also a life member of the Central States Numismatic Society, the Florida United Numismatists and a member of ICTA. Mike Byers was a Consultant for ANACS for Mint Errors from 2000 through 2006.

Allan Levy has been specializing in Mint and Currency Errors for 25 years. His web site features a diverse group of type errors, modern errors and major currency errors. He also handles regular U.S. and World coins. Allan Levy is a member of CONECA and the American Numismatic Association.

Fred Weinberg is the President of Pacific Rim Numismatics (DBA Fred Weinberg & Co.). He is a highly respected numismatist, with 35 years of full time experience in the rare coin marketplace. His professional associations include the American Numismatic Association (ANA) (38 years), the Professional Numismatist Guild (PNG) (31 years), The Industry Council for Tangible Assets (ICTA) (21 years) and The Numismatic Literary Guild. He is a past President of the Professional Numismatist Guild (1999-2001).

Additional sponsors of Mint Error News are Heritage Auction Galleries, CoinLink, CoinFacts.com, uspatterns.com and errorworldclub.org. We encourage collectors and dealers to submit articles and photos of major mint errors that we may feature on the website.

Off-Center Errors

by Al Levy (alscoins.com)

Here are records of recent sales of off-center mint errors on eBay:

1. All coins were listed on eBay and closed from October 1, 2006 to December 31, 2006.
2. All lots had buyers. If the coins actually changed hands is unknown.
3. A picture accompanied each lot or it was not recognized.
4. Mislabeled items were ignored.
5. Some lots may have changed hands more than once.

6. "D" next to the date symbolizes that the coin had damage or was scratched.
7. "C" next to the date symbolizes that the coin was cleaned.
8. "B" next to the date symbolizes that the coin had damage and was cleaned.
9. If the date or mint mark was missing or partially visible, parentheses were used.
10. Postage/handling/insurance fees were ignored.
11. Major auctions were not listed.

**NORTHEAST
NUMISMATICS
INC. RARE COINS · PERSONAL SERVICE**

Northeast Numismatics has an impressive inventory of over 1,200 U.S. and foreign coins. We have a strong selection of mint errors, both U.S. and foreign. And we carry every area of United States coinage from colonials through rare gold including type, commemoratives, silver dollars and much, in addition to our extensive inventory of world coins.

High quality "fresh" coins are what we are known for and take pleasure in offering. We constantly are hearing from our customers about our excellent prices and high customer service. 2003 is our 39th year of business, so order with complete confidence. Also, please keep in mind that we are always buying coins of all kinds, certified and uncertified, to fill our want lists.

Northeast Numismatics
10 Concord Crossing, Ste. 220
Concord, MA 01742

Buffalo Nickel “Speared Bison” & Wisconsin Quarter “Extra Leaves”

by Al Levy (alscoins.com)

PLEASE NOTE: THE ERROR TYPES LISTED BELOW WERE EBAY LOTS THAT CLOSED WITH A HIGH BIDDER. IF THE RESERVE PRICE WAS NOT MET, OR PICTURE WAS NOT ATTACHED, THEN I IGNORED THE AUCTION. FUZZY PICTURES, OR QUESTIONABLE DESCRIPTIONS ARE NOT INCLUDED.

AN IMPORTANT OBSERVATION IS THAT THE BUFFALO 5c “SPEARED BISON” HAVE DROPPED IN PRICE. WHILE THE WISCONSIN “EXTRA LEAFS” CONTINUE TO DROP IN VALUE. THERE WERE A GROUP OF HIGH GRADE HIGH LEAFS THAT DIDNOT SELL. LOW LEAFS VALUE HAS STAYED STEADY SINCE THE LAST UPDATE. MANY OF THESE ERRORS ARE STARTING TO SHOW UP AT CONVENTIONS IN DROVES WITH LOWER PRICES.

FROM 10/01/06 TO 12/31/06

PCGS Certifies 1965 English Penny Struck on a Gold Planchet

by Mike Byers (mikebyers.com)

This is one of the most spectacular major mint errors of all time. It is a 1965 English Penny struck on a gold planchet weighing 18.3 grams instead of being struck on a copper planchet. This unique numismatic rarity first surfaced in 1975 when Fred Weinberg bought it in a deal. I was in his office a few days later and immediately purchased it after admiring and examining it. I then sold it to one of my customers.

It is a pleasure handling this Gold Penny again after 30 years. It has been authenticated and certified Mint State 62 by PCGS and is still the only one known. It is slightly larger than a U.S. Kennedy Half Dollar blank and is in choice mint state condition with spectacular luster.

Upon certifying this coin, Fred Weinberg stated that *“it was totally unexpected when I saw this ‘old friend’ cross my desk, since I authenticate the mint errors for PCGS. I bought and sold this unique English Penny struck in gold 30 years ago. After selling it to Mike Byers at that time, I remember the thrill of holding this heavy English gold Penny in my hand. It was just certified by PCGS in January 2007 and is still one of the neatest, exciting and most obvious ‘off-metal’ coins of any type that I have ever handled.”*

Recently in the ANR auction on 04/15/05 of the Eliasberg collection, a small group of coins struck in gold sold. Here are a few of the prices realized:

1902 English Pattern Crown in Gold by Spink NGC MS 62 - \$39,100

1845 2 Gulden Struck in Gold NGC PR 63 - \$23,000

1684 English 30 Florins in Gold NGC MS 61 - \$27,600

(1923) China Dollar in Gold NGC MS 64 - \$21,850

1818 German Thaler Struck in Gold NCS AU details - \$18,400

NGC Certifies 1875-CC \$20 Liberty Partial Collar

Major mint errors on U.S. gold coins are very rare. This is only one of two major mint errors on a gold coin from the U.S. Branch Mint in Carson City, Nevada that I am aware of.

A slightly double struck Carson City Morgan Dollar recently sold for approximately \$30,000. There are many serious collectors who place special importance on mint errors from the Carson City Mint due to its history.

This Carson City \$20 Liberty has a full partial collar which is easily seen in the new NGC holder which displays the edge.

This date is also rare and in this condition is a five figure coin, even without the partial collar. This Carson City \$20 Liberty is a recent discovery and is very exciting since it combines the rarity of a major mint error on a gold coin with the popularity and history of the U.S. Branch Mint in Carson City.

1864 Large Date 2¢ Struck on a 1¢ Planchet

Major mint errors in the 2¢ series are very rare. There are only a handful of 2¢ off-metals known. This one was struck on a blank planchet intended for an Indian cent. It is well centered, shows much of the date and is almost uncirculated.

One-sided Doubling From Direct Die Contact: An Overview

by Mike Diamond

Over a dozen different forms of raised, one-sided doubling are currently recognized (Diamond 2006a). Some fall into the category of “die variety”, and include doubled dies, repunched dates, and repunched mintmarks. Some, like counterclash, are a form of die damage (Diamond 2002b, 2002c, 2004) and fall into the overarching category of “die error”. Some, like die deterioration doubling, are the result of die wear and deformation. Other forms of raised doubling, like “expansion ripples”, depend on the presence of an intervening die cap (Diamond 2005b).

In this article, I’ve chosen to restrict my coverage to forms of one-sided, raised doubling produced by simple, direct contact between die and coin. You’d think this would be a short list, but it’s actually far more extensive than most folks realize.

Figure 1a - Obverse face of a triple-struck 2001-D nickel with a horizontal misalignment of the hammer die on the second strike.

One-Sided Double-Strikes

We begin with bona fide double-strikes, but with a twist. It’s possible for a newly-struck coin to remain firmly attached to one die, while the other die shifts position prior to the second strike. These are “one-sided” double strikes because the doubling is visible on only one face. There are two subtypes (Diamond 2002a, 2003).

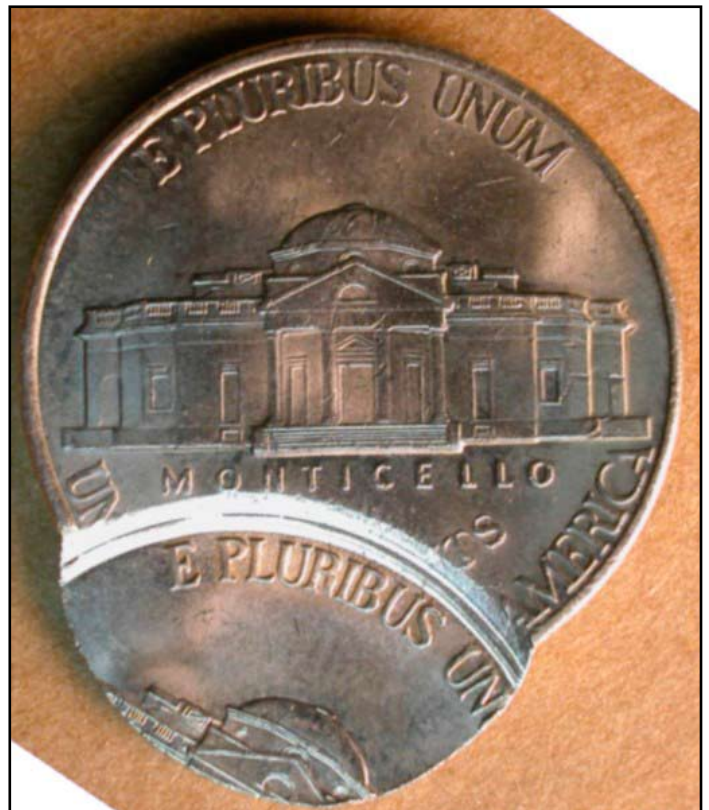

Figure 1b - Reverse face of the same coin.

One type of one-sided double-strike features a horizontal misalignment of the hammer die between the first and second strike. Figure 1 shows such an error in a 2001-D nickel. The first strike was normal. The second strike featured a misalignment of the obverse (hammer) die toward the right. The coin rested fully within the collar during both strikes and

it's possible that the collar didn't even retract between the two strikes. An off-center third strike is a splendid bonus. Surprisingly, that third strike was delivered by a different set of dies, as the reverse face shows a later die state. It also seems that the third strike was delivered with a considerable time delay. The two centered strikes are covered with lots of contact marks, while the third strike shows hardly any.

Figure 2a - Reverse face of a double-struck 1948 New Zealand 1 florin coin with a rotation of the hammer die on the second strike.

Figure 2b - Obverse face of the same coin.

The other type of one-sided double-strike is produced when one die (usually the hammer die) rotates between strikes. Figure 2 shows a 1948 New Zealand florin with a one-sided double strike (rotational subtype) on the reverse face. New Zealand coins, like most British Commonwealth countries, strike their coins using the reverse die as the hammer die. There was a half-letter clockwise rotation between strikes. The coin was fully seated in the collar during both strikes and the reeding shows no disruption. Once again, I suspect the collar did not retract between the first and second strikes.

Machine Doubling

This form of doubling has been variously referred to as “machine doubling”, “mechanical doubling”, “machine doubling damage”, “machine damage doubling”, “strike doubling”, “ejection doubling”, and “shift doubling”. It occurs after the hammer die has reached the lowest point of its downstroke. While machine doubling can occur on either face (or both faces simultaneously), truly severe cases seem restricted to the face struck by the hammer die. There are two subtypes of machine doubling (Diamond 2006b).

Figure 3a - A 1992-P nickel with severe machine doubling (“push doubling” subtype) on the obverse face. Coin acquired from Mark Westcott.

Figure 3b - Close-up of the back of Jefferson's neck showing marginal shelving.

The first type occurs when the hammer die bounces, shifts position and then comes down lightly on top of the coin in a different position. Sometimes referred to as “push doubling” or “push doubling damage”, it occasionally produces dramatic design duplication reminiscent of a double-strike. Figure 3 shows a 1992-P nickel with dramatic push doubling on the obverse face. The back of Jefferson's head shows the flat, marginal shelving that is almost always present at the edge of design elements in this form of machine doubling. Clear design duplication appears at the bottom of Jefferson's bust, most noticeably the designer's initials. Another affected area is the underside of Jefferson's throat. See Diamond (2006b) for other extreme examples of push doubling.

Figure 3c - Close-up of the base of Jefferson's bust showing duplication of the designer's initials.

The other subtype of machine doubling commences the moment the lowest point of the downstroke is reached. The die shifts laterally before retraction begins and continues its lateral shift as retraction is initiated. As a result, the die drags itself through the design, smearing it and piling up metal in a series of ridges at the edge of each smeared area. Sometimes referred to as “slide doubling”, it can produce equally dramatic effects. Figure 4 shows a 1997-D Kennedy half dollar with severe slide doubling. After impact, the die dragged itself to the right, smearing the design in a grotesque fashion. This half dollar also shows a misalignment toward the left. Clearly this hammer die was unstable, landing initially too far to the left, and correcting its position by dragging itself to the right after impact. See Diamond (2006b) for equally dramatic examples.

Figure 4 - A 1997-D half dollar with severe machine doubling (“slide doubling” subtype) on the obverse face.

Stutter Strike

A stutter strike is the polar opposite of machine doubling. Instead of occurring after completion of the downstroke, it occurs near the beginning of the downstroke, just as contact is being made with the planchet (Diamond 2001).

A stutter strike can be caused by a die that is loose in the horizontal and vertical planes. If it shifts after making initial contact, you’ll find a coin with a thin crescent of die-struck design lateral to the normal design. A stutter strike can also occur as a rare side effect when a second planchet or coin intrudes into the striking chamber. It is often the case that a partial brockage or indent will cause the exposed part of the planchet to bend up toward the hammer die. The concentrated, asymmetrical pressure created by two stacked discs causes simultaneous expansion of the planchet well before the hammer die reaches its lowest point. On rare occasions, the upwardly angled portion of the planchet makes transient contact with the descending hammer die as it is simultaneously being pushed beyond the boundary of the striking chamber by the expanding part of the planchet trapped between the dies. The result is a trace of die-struck design on the otherwise unstruck part of the planchet, lateral to the normal die-struck design.

Figure 5a - Reverse face of a 1999-P nickel showing a very clear stutter strike in the southeast quadrant. Coin acquired from Charles Rickard.

Figures 5 and 6 document a third circumstance leading to a stutter strike. These two 1999-P nickels were struck in a press in which the reverse die acted as the hammer die. (“Inverted die installation” was common by this time.) In this case the hammer (reverse) die was unstable. This alone wouldn’t have created a stutter strike except for the fact that each planchet was fed in off-center on top of a very stiff collar.

Figure 5b - Obverse face of the same coin.

These three ingredients (wobbly die, off-center feed, stiff collar) led to the production of a large group of stutter strikes and near-stutter strikes. Dozens, perhaps hundreds, of nickels were produced by this malfunctioning press. Many of them show a greater or lesser degree of stutter strike development. Only a few show as much design duplication as the coin in Figure 5. The tips of the letters of AMERICA show beneath the normal letters.

Figure 5c - Close-up of the affected area, showing an extra set of letter tips from AMERICA.

A trace of those letter tips are seen in the nickel shown in Figure 6. Here's what I think happened: The hammer die initially struck the planchet where it was resting on the stiff collar. This was the highest point of the planchet, with the remainder tilted down into the striking chamber. With the initial impact, the hammer die shifted to one side while simultaneously bouncing up or causing the collar to recoil downward.

Figure 6a - Reverse face of another 1999-P nickel showing a very clear stutter strike in the southeast quadrant. Coin acquired from Bill Erdakos.

Figure 6b - Obverse face of the same coin.

The hammer die then completed its downstroke while simultaneously depressing the collar through the intermediary of the off-center planchet. The letter tips are the result of the initial light contact, while the full design was produced at the completion of the downstroke. See Diamond (2001) for more examples of stutter strikes.

Figure 6c - Close-up of the affected area, showing an extra set of letter tips from AMERICA.

Ejection Impact Doubling (EID)

Ejection impact doubling was recently recognized and named by Diamond (2005a). Definitive examples are so far only known in 2000-P and 2000-D Sacagawea dollars. It occurs when a newly struck coin is ejected from the striking chamber and is thrust or hurled into the hammer die face. Shallow, recessed

design elements in the die face contact high-relief areas of the coin, causing light transfer of design elements from die to coin. Transferred design elements are incomplete, patchily distributed, and often located in positions far removed from their normal counterparts. While the duplicated design elements usually show the same orientation as their normal counterparts, a small percentage show dramatic rotation. Many different die pairs have produced hundreds of examples of EID among the aforementioned dollar coins. Figure 7 shows a classic example of EID in the form of an extra iris and pupil sitting on the brow of a 2000-P Sacagawa dollar. Its normal counterpart is the iris and pupil you see on the right. See Diamond (2005a) for more examples.

Figure 7 - An example of ejection impact doubling on a 2000-P Sacagawea dollar. An extra right iris and pupil sits in the middle of her brow, equidistant from the two normal eyes. Coin discovered by Mike Clements.

Other Forms

Other forms of raised doubling arising from direct die contact are known or suspected. Robert (“BJ”) Neff recently discovered a remarkable example in a 2004 cent (Figure 8). The tips of the letters “ITED STATES ... AM” are prominently displayed on the design rim, just above and to the left of their normal counterparts. Everything else about the coin is perfectly normal. This may be an unusual (and unprecedented) form of strike doubling or ejection impact doubling. Or it may be something new. A full report will be published in the January/February 2007 *Errorscope* (Diamond, in press).

Figure 8a - Reverse face of a 2004 cent showing an extra set of letter tips on the design rim. The tips of the letters “ITED STATES...AM” have been duplicated by a process that has yet to be determined. Coin discovered by Robert (“BJ”) Neff.

Figure 8b - Close-up of the letters “TED ST”.

Error Coin Information Exchange

The Error Coin Information Exchange (ECIE) is a freewheeling forum dedicated to the study of error coins and varieties. Founded and hosted by veteran writer and researcher Mike Diamond, it is a great place to visit, whether you're an established collector or a novice. ECIE is not flashy and doesn't waste your time with a message board clogged with idle chit-chat. It simply provides the best information on error coins available on the web. Here you can read about late-breaking developments; find out about the newest discoveries; listen or participate in spirited debates about how error coins are produced; test your skills with periodic quizzes and brain-teasers. ECIE proudly maintains an atmosphere of skeptical inquiry. Here, no claim goes unchallenged and no theory goes untested. This is the best place to find out what kind of error you really have, how it was created, and the extent to which it is rare or unusual.

Policy Statement: By design, ECIE does not attempt to develop partnerships with dealers, grading services, or auction houses. It neither seeks, nor encourages, discounts, promotions, giveaways, or advertisements. To do otherwise would create a conflict of interest that could compromise the fierce independence and impartiality that distinguishes ECIE from all other on-line error coin clubs.

Pennsylvania Quarter Double Struck Mated Cap Pair

This is a spectacular and very dramatic mated cap pair of PA State Quarters. The top piece is a double struck obverse cap that is extremely deep. It wrapped around the obverse die and struck many coins. The bottom piece mates perfectly to the double struck cap, it fits very snug, and locks into place. This piece is also deep dish shaped and began to take the shape of the cap above it. A wild mated pair.

CONECA

The Combined Organizations of Numismatic Error Collectors of America

CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

CONECA Error Examination Services

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

conecaonline.org

1943 Lincoln Cent Struck on a Cuba One Centavo Planchet

This Lincoln cent was struck on a Cuba 1 Centavo brass planchet (2.3gm). At the 2006 Denver ANA B&M Auction, a 1943 Cent on Surinam/Curacao 25 Centavo planchet ANACS Net F 12, VF Details damage (Lot #377), brought \$16,675. In the auction listing, Bowers & Merena described this off-metal as “perhaps the most interesting coin in the entire sale, and it is rarer than the coveted 1943 Copper Cent... A historically significant and almost certainly

unique error, this 1943 ‘Curacao’ Cent is sure to draw considerable bidder attention due to its association with the famous 1943 Copper Cents.”

This 1943 Lincoln cent off-metal struck on a Cuba blank is unique. To my knowledge, there are only four known 1943 dated Lincoln cent off-metals struck on planchets intended for foreign countries.

1851 3¢ Obverse & Reverse Die Trial Struck on Cardboard

by Mike Byers (mikebyers.com)

This is a spectacular 1851 3¢ Obverse and Reverse Die Trial struck on cardboard. This glaze-surfaced card is .35mm thick and measures 85mm wide by 50mm tall. It is clearly embossed with lettering and design elements raised. After the dies struck the cardboard, a bronze-gold ink was applied to show the high relief.

This die trial is featured in the Judd 9th Edition of United States Pattern Coins on page 296 as the Plate Coin JA1851-1. There are two known examples, one in the Library Company of Philadelphia collection that includes a March 24, 1851 letter from James Longacre to the Secretary of the Treasury stating that “It is the first impression I have taken from the dies I have been preparing for the three cent piece ordered by congress.”

This example includes an August 17, 1857 letter from George F. Nesbitt, who was contracted to supply imprinted postal stationery to the Post Office Department from 1853 until 1870. He was searching for a die that could be used to emboss postal stationery. Longacre, who designed the three cent piece, supplied him with the proof that had been produced in 1851. Nesbitt's letter to Third Assistant Postmaster General:

New York, August 14th 1857.

Hon John Mason,
Third Assistant P. M. Gen.
Dear Sir,

As per understanding
I called at the United States Mint yesterday, but did not see Mr. Snowden; - he had left the city to be gone several days - I saw his representative who introduced me to the Chief Die Sinker - Mr Longfield. Mr Longfield informed me that there was no Head of Washington at the Mint that he thought suitable for the purpose, not could he tell me of any one capable of producing what I required. He thought that the death of Mr. C. B. Wright had left a vacancy in that branch of Art not easily filled. =

Mr Longfield recommended the enclosed as a suitable mark for the Three Cent Envelopes, and suggested that if it was used he would like the credit of originating the idea. = I told him I would forward the Card and his remarks to you. =

I shall make all diligent exertion to procure a head that will please, and will inform you as early as possible how I progress. =

Very respectfully,
George F. Nesbitt

Here is the content of the letter:

“I called at the United States Mint yesterday, but did not see Mr. Snowden. I saw his representative who introduced me to the chief Die Sinker = Mr. Longfield (error for James Barton Longacre). Mr. Longfield informed me that there was no Head of Washington at the Mint that he thought suitable for the purpose, nor could he tell me of any one capable of producing what I required. He thought that the death of Mr. C.C. Wright had left a vacancy in that branch of art not easily filled.

Mr. Longfield recommended the enclosed as a suitable mark for the three cent envelopes, and suggested that if was used he would like the credit of originating the idea. I told him I would forward the card and his remarks to you.

I shall make all diligent exertion to procure a head that will please and will inform you as early as possible how I progress.”

The March 3, 1851 Act of Congress reduced the postal rate for a single letter sent up to 3,000 miles to three cents. The 3¢ stamp was issued on July 1, 1851 for prepayment of this postal rate.

This same act of March 3, 1851 also authorized the first issuance of a three cent coin. This is the first instance of a coin being issued directly to aid in the payment of a postal rate in the United States.

The three cent envelopes issued in 1853 were the first postal stationery of the United States.

These were manufactured by George Nesbitt & co. and he placed his embossed seal on the reverse until ordered to discontinue the practice on July 7, 1853. These were intended to be purchased in bulk by business users at a slight advance over the imprint stamp value. A quantity of 75 of these would have cost the purchaser \$2.39.

NGC Brings VarietyPlus Catalog Online

A comprehensive listing of all the variety coins currently attributed by NGC has been added to NGC's website, www.ngccoin.com. This free online resource includes a brief description of each coin series, and entries for each coin showing how the variety is described on the NGC certification label. It is accessible from the main navigation menu on NGC's website.

A variety is a coin that has characteristics specific to the die pair that struck it. For early silver and copper U.S. coins, pre-1836, NGC identifies individual die pairings according to the most commonly used reference works for each series, as follows:

Half cents by Cohen numbers

Large cents by Sheldon (1793-1814) and Newcomb (1816-57) numbers

Half dimes (1794-1837) by Logan-McCloskey numbers

Dimes (1796-1837) by John Reich numbers

Quarter dollars (1796-1838) by Browning numbers

Half dollars (1794-1836) by Overton numbers

Silver dollars (1794-1804) by Bowers-Borckardt and Bolender numbers

For gold coins and coins minted after 1836, with the exception of Silver Dollars minted between 1878 and 1935, NGC recognizes coins by VarietyPlus number. Silver dollars minted from 1878 to 1935 are described by VAM numbers. Only select VAM's are eligible for attribution and interested parties are advised to visit the online catalogue.

To receive a variety attribution with uncertified coins being submitted for grading, simply choose VarietyPlus on your submission form, fill in the Variety column for that line with the type of variety you're seeking (Overton, VAM, VP, etc.) or, if known the exact variety number. Either way, NGC will examine your coin and enter the correct variety attribution on its grading label. A \$7 fee is charged for this service in addition to the regular fee for the grading tier you've selected.

In the case of coins already graded and encapsulated by NGC, you may have the correct variety attribution added by submitting the encapsulated coin under our Designation Review service. The fee for Designation Review is \$10.

Some major varieties are attributed by NGC at no charge during the regular course of grading. A "fee" column in the online catalogue details whether a coin requires an additional service fee in order to be recognized. A future release of this catalog will include important attribution information and detailed photographs, and a hard copy release is also planned.

Questions may be directed to NGC variety specialists at VarietyPlus@ngccoin.com.

ANACS Certifies “Two Headed” 2 Cent Euro

by Mike Byers (mikebyers.com)

This exciting discovery is a unique 2000 France 2 Cent Euro struck by two obverse dies. It is the only known “Two Headed” Euro coin discovered from any of the countries in the European Monetary Union.

On January 1, 2001 the Euro officially became the first common European Currency, replacing the individual National Currencies of the 12 Member Countries of the European Monetary Union. These countries are: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxemborg, Netherlands, Portugal and Spain. Every Euro Coin carries a common reverse design. Each of the 12 Member Countries strike the Euro with its own unique obverse design. Regardless of which Country is depicted on the obverse of a Euro Coin, it is accepted in any of the 12 Member Countries. Euro Coins were minted starting in 1999. Not every country struck every denomination of Euro Coins in the first year. By the beginning of 2001 each country had a sufficient supply of Euro Coins on hand. Euro coins were then distributed and released into circulation.

There are approximately thirty genuine two-headed or two-tailed coins that have been authenticated by ANACS, PCGS or NGC. There are only three known “Two Tailed” U.S. coins: two Quarters and one Dime. One of the Quarters recently sold for \$80,000.

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our web site you must agree to the following terms and conditions.

1. All major U.S. mint errors are accepted if they are certified by PCGS, NGC, ICG or ANACS.
2. The approximate value of each item must exceed \$5,000.
3. Each item must meet our inventory criteria in terms of desirability and market value.
4. Byers Numismatic Corp charges a 10 % commission for each sale.
5. The minimum time for any listing is thirty days.
6. Seller agrees to a seven day return privilege from date of receipt.
7. Seller agrees to use an escrow service if requested by the buyer.
8. We reserve the right to deny or cancel any listing at any time.
9. All listing are subject to prior sale.

Please do not offer us the following:

1. More than two coins bonded together.
2. Caps more than ½ inch high.
3. U.S. Errors that were obviously and intentionally struck as error coins. No impossible mint errors.
4. We only accept consignments of U.S. Errors that were legitimately released through normal distribution channels.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a Mint Error collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

Mint Error News Price Guide

- Entire Price Guide Updated 03/01/07 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,500 - \$2,500	N/A	\$4,000	\$3,000 - \$5,000	\$750

Mint Error News Price Guide

Broadstrikes

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Mint Error News Price Guide

Partial Collars

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Bonded Coins

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Coins Struck on Feeder Finger Tips

After a recent tour of the U.S. Mint at Philadelphia, it was discovered that the minting process had changed to some degree. One of the changes was that “feeder fingers” were used during the striking of all denominations of U.S. coins. Prior to this tour, U.S. coins that were struck on feeder finger tips were authenticated and described as being struck on aluminum scrap. Coins from all modern denominations have been discovered that were struck on the tips of these feeder fingers.

Denomination	Small	Medium	Large

Struck Fragments

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Mint Error News Price Guide

Mated Pairs

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an

obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Mint Error News Price Guide

Transitional Errors

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

U.S. Gold Errors

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center

Mint Error News Price Guide

Indents

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

Off-Center Strikes

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Off-Metals

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Trio of Walking Liberty Half Dollar Errors

by Tom Caldwell of Northeast Numismatics (northeastcoin.com)

This trio of Walking Liberty Half Dollar mint errors is quite possibly the most impressive that has ever been offered. All three pieces are extremely rare, and together as a group, they present a once in a lifetime opportunity for the serious mint error collector.

The first coin in the group is a 1942-S that has been double struck, with the second strike 85% off-center. Visually stunning, particularly when taking into consideration the denomination. The coin is lustrous and virtually fully brilliant, and has been graded as MS64 by PCGS.

The second coin in the group is a 1945-S that has also been double struck, with the second strike 55% off-center. Probably our favorite of the trio, this coin was not completely ejected from the dies (as with the 1942-S), and a second striking occurred, thus striking another nearly half-impression of a Walker onto the first. As you would expect to see in such a case, the second strike is superbly sharp, as the entire force of the dies is being impressed on a small surface area. The detail of the second striking is sharper than you will see even on most proof issues. As with the 1942-S in the group, the coin is lustrous and nearly fully brilliant. It has been graded by PCGS as a MS63.

The final coin of this amazing group is a 1943-(S) that has been struck on a Peru Half Sol planchet. It has been common practice for the U.S. Mint to strike coins for other countries, the first being in 1876 (for Venezuela). The U.S. Mint struck four denominations for Peru in 1943, and somehow a Half Sol planchet made its way into a run of Walkers. There is no mintmark visible on this particular error, but since all coins struck for Peru in 1943 were struck in San Francisco, it is obvious the Walker was meant to be a 1943-S. An off-planchet errors, particularly on foreign planchets, are ridiculously rare in higher denomination coins. The coin is well struck, and very eye catching, as it is struck on a brass planchet. It has been graded as a MS63 by PCGS. This set is available from Northeast Numismatics for \$82,500. Please see our website for additional photos and information.

2007 Looks Like A Happy, Happy New Year

by Rich Schemmer (richerrors.com)

By all the signs of the FUN Convention, error coins continue to be one of the hottest parts of the Numismatic market. The many auctions held at FUN set many new price records. What amazed me was how the submitters placed high reserve prices on their coins. In other words, sellers wanted top prices or they were going to take their coins back. It seems that many sellers will no longer place a low reserve and hope to sell for a higher price. They've come to the conclusion that their errors are too valuable and want the dollars or they're going to sell elsewhere. Seems like somebody removed the gate on the bulls pen and there is no stopping their charge.

At the Convention floor at FUN there was a severe shortage of errors. What could be found outside of a few attending error dealers show cases proved to be VERY expensive. I was offered a 1993 Quarter on a Nickel planchet for \$800 by a non-error coin dealer as well as a 20% off-center 1859 Indian Cent MS 64 for a mere \$9,000. Ouch... OK, OK there were some errors I was able to buy! A 1976 Double Denom 11¢ piece for \$1,200 and a 35% off-center Ike dollar for \$3,000. Definitely no steals, but still some TOUGH eye appealing error coins that still have potential and a bunch of stuff for eBay.

One amazing auction was the 1859 ½ dime struck on an Indian 1¢ sold for \$71,000. That was a pretty amazing price over what many thought \$50,000 would be tops for that error. Then again I'm not brave enough to step in front of a charging bull...are you?

What do we expect for the rest of this year? Many new advances in error coin prices, Double Denomination 11¢ & 6¢ pieces are currently selling for \$900 - \$1,200 for BU examples. They will continue to creep ahead to the \$1,500 level with in a year's

time. 6¢ pieces will settle between \$1,500 - \$1,800 as they are much scarcer. ALL off-metal errors will continue to lead the bull charge and grow in popularity & higher prices. Even common 1980 Nickel on Cent Planchet errors are selling for \$300 and more! Better dates \$400 and more. By the end of this year expect \$500-600.

Just about anything that can NO longer be found (that includes nearly everything) will have huge price surges. While many error collectors think this is a false, overpriced market, believe me, anyone who thinks this way will be left behind. I've heard these disgruntled rumors and overpriced market believers back in 1995, 1999, 2001, 2003 & 2006. All those complainers have plenty to complain about, because they're regretting not buying those errors in 1995, 1999, 2001 & 2003 AND will again for not buying this Year. There are just too few errors to be had or located and too many buyers that are willing to pay the new higher prices. So will you be left behind? Or will you except the charging bull market and buy what you like at a price that is affordable for TODAY...

MINT ERROR PRICES REALIZED IN HERITAGE GALLERIES FUN SIGNATURE COIN AUCTION

\$46,000.00**

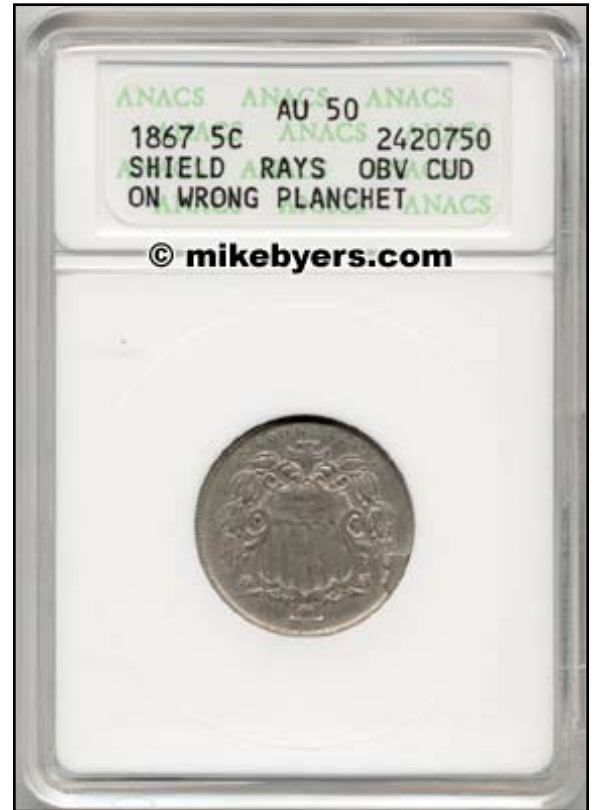

1867 Shield Nickel With Rays Struck on Wrong Planchet

Shield Nickel off-metals are extremely rare. This off-metal is the RAYS variety, a two year type from 1866 and 1867. There are three known Shield Nickels with “RAYS” struck on Cent Planchets. U.S. Mint Documents and Records show that no coins were struck at any of the U.S. Mints for foreign countries between 1855-1875. Since this blank planchet is of Nickel composition, and weighs 3.56 grams (55 grains), it is most likely struck on a left over blank from the previous year that was intended for a 1866 Pattern Shield Nickel.

According to Pollock’s United States Patterns and Related Issues page 147 and assigned Pollock #577 (Judd-489), Pattern Shield Nickels of different designs were struck on thin Nickel blanks. The two listed are the Garrett coin, weighing 54.1 grains, and the Bass coin, weighing 54.7 grains.

Since this coin weights 55 grains (within tolerance) and since the U.S. Mint did not strike foreign coins during this 20 year time period, the most likely scenario is that it is on a left over pattern blank from the preceding year. This is a spectacular wrong planchet Major Mint Error.

World Mint Errors

by Fred Weinberg (fredweinberg.com)

I wanted to share some of my recent world mint error purchases with the readers of Mint Error News Magazine.

1876 German 10 Pfenning ANACS VF-30

Struck on a 5 Pfennig planchet. Incredibly Rare Early Off-Metal.
What would this be worth if it was a U.S. coin?

1918 German 10 Pfenning PCGS MS-63

Double Struck-second strike 70% off-center. Uniface obverse second strike. Very dramatic second strike spread.

1975 Mexico 1 Peso PCGS MS-66

Struck on a 50 Centavo planchet.

1975 Mexico 1 Peso PCGS MS-66

On 50 Centavo planchet + Clips. This wrong planchet also has two small clips hidden by the insert, still a fun wrong metal planchet.

1975 Mexico 1 Peso PCGS MS-66

Struck on a 20 Centavo planchet.

1978 Canada 1 Cent PCGS MS-64

Double Denomination on a 1977 DIME. Both full dates show, extremely strong on the reverse. Very dramatic-Great detail.

1982 Canadian Dime PCGS MS-62

MULED- with 1982 1c Reverse Die. A unique muling. Same as 1999 Cent/Dime that sold this year for \$138,000.

1998 Canadian Dime PCGS MS-66RD

Unplated Multi-Ply Planchet intended for 1999 Test pieces. It is copper color obverse and reverse.

2000 Canada Half on SAC \$1 PCGS MS-64

UNIQUE- Struck on a Sacagawea Dollar planchet! This coin was first discovered in 2001.

N.D. Canadian Nickel PCGS MS-63

Struck with Two Obverse Dies. A genuine Two-Headed Nickel.

1989 Cuba 10 Centavos PCGS MS-64

Struck on an Elliptical Clipped planchet. The first major Error Cuban coin I've ever handled.

1990 Isle of Man 1/5th Crown PCGS MS-67

Struck with Platinum Dies. This is probably the highest grade. Single piece does not come with normal gold coin.

2005 Great Britain 1 Pound PCGS MS-62

Struck on 5.7 gram planchet. An off-metal on a smaller chocolate-color foreign planchet.

2005 Great Britain 10 Pence PCGS MS-64

Struck on a 5 Pence planchet. Brilliant PL & PQ.

N.D. Great Britain 10 Pence PCGS MS-62

Struck on a 1.9 gram Octagonal planchet. An eye-catching Brass-colored planchet. Looks Gold.

N.D. Great Britain 50 Pence PCGS MS-64

Struck on a 20 Pence planchet. Weight: 3.3 grams/51 grains.

ND (1970-80 Type) Mex. 50C. PCGS MS-66

Struck on a 20 Centavo planchet.

2001 India 50 Paise PCGS MS-64

Struck on a 25 Paise planchet. Also has a double rolling fold @ 3:30.

(2005) Malaysia 1 Sen PCGS MS-64RD

Struck with Two Reverse Dies. A "Two-Drum'd Reverse".

2004 Malaysia 1 Sen PCGS MS-65RD

2pc. Bonded Multi-Struck Pair. Two coins bonded/struck together. Struck numerous times and is Half Dollar size in diameter.

2004 Malaysia 10 Sen PCGS MS-63RD

Mated Pair Uniface Coin # 1

2004 Malaysia 10 Sen PCGS MS-63RD

Mated Pair Uniface Coin #2

2004 Malaysia 10 Sen PCGS MS-64

Coin #1 is a Deep Die Cap and mated to Coin #2, which has expanded uniface obverse. This is Coin #1.

2004 Malaysia 10 Sen PCGS MS-66

Coin #1 is a Deep Die Cap and mated to Coin #2, which has expanded uniface obverse. This is Coin #2.

2005 Malaysia 1 Sen PCGS MS-64

Struck on a larger 20 Sen coin. A dramatic overstrike onto a larger previously struck coin.

2005 Malaysia 1 Sen PCGS MS-64RD

Struck with Two Obverse Die. A "Two-Palm'd Obverse".

2005 Malaysia 1 Sen PCGS MS-65

Struck on a large 20 Sen planchet. A perfect 1 Sen struck in the middle of a much larger 20 Sen Blank planchet.

2005 Malaysia 10 Sen PCGS MS-63

Struck on a 1 Sen 1.7 gram planchet. A nice simple basic off-metal.

2005 Malaysia 10 Sen PCGS MS-64

Struck on a larger 20 Sen planchet. A perfect 10 Sen strike in the middle of a larger 20 Sen Blank planchet.

2005 Malaysia 10 Sen PCGS MS-65

Struck onto larger 20 Sen coin.

2005 Malaysia 10 Sen PCGS MS-66

Muled with 1 Sen Reverse Die. A fun Mule.

2005 Malaysia 10 Sen PCGS MS-66

Muled with 1 Sen Obverse Die.

2005 Malaysia 20 Sen PCGS MS-64

Struck Eleven Times-Ten strikes Off-Center. A dramatic "Step-Ladder" Multi struck coin.

2005 Malaysia 20 Sen PCGS MS-65

Overstruck with 10 Sen Dies. A great "Double Denomination"- You can see both the full 10 & 20 Sen + 2005 Dates.

WHOLESALE PRICE LIST OF MAJOR MINT ERROR COINS & CURRENCY

We proudly offer many dramatic & very Rare Type coins, and more current Errors (1960's + 1970's) that have not been on the market for 20-30 years. These really "Fresh" Errors are from a collection put together in the late 1960's thru the 1980's, and many were originally purchased directly from Phil Steiner/Mike Zimpher, well-known mid-west dealers back then.

Don't forget you can view all Certified Error Coins and Error Currency on our website (www.FredWeinberg.com). Every customer ordering over \$100 off this list/website will receive a special "Year End Thank You" gift. There are many Reduced Prices from the unsold coins on our June list. When ordering by phone or email, please list the page #, short description of the item (Date, Error, Grade, and Price), so we know exactly what coin (s) you are interested in.

We accept Checks, Money Orders, & Pay-Pal Sorry No Credit Cards...We always pay for all Postage & Insurance fees for U.S. shipments. Paying via Pay-Pal: Just use our email address (Fred@Fredweinberg.com) as the receipt when sending funds.

Note: The PCGS/NGC Certified section of better Major Mint Errors start after the raw listings.

Abbreviations Used:

DSBS=Die Struck Both Sides, (refers to a D/S coin's second strike) F/O=Flip-over D/S=Double Struck B/S=Broadstruck FS=Full Steps FB=Full Bands FBL=Full Bell Lines RD=Red R+B=Red & Brown PL=Proof-Like CCW=Counter-Clockwise DAS=Die Adjustment Strike

Note: Clip %'s are by actual weight, not appearance (most clips "look larger" than % of clip).

Editor's Note: Fred Weinberg's price list was originally published in November of 2006. The following list has been updated and is current as of January 30, 2007.

MAJOR MINT ERROR PRICE LIST OF U.S. COINS	
Large Cent TYPE-II Blank Planchet Weight: 165 grs. (Standard 168 grs.) Very Scarce-Circ.	\$200
1943 Steel Cent Planchet Strip 4" x 2 3/4"-This is a "Error Coin of the Month" item. Issued from May 1975 (dated), autographed by Jim Heine. Comes with a T-I & T-II Copper Blank Cent, and explanation. A great educational and display item (2-A).	\$135
1943-P Lincoln Cent Struck on a Silver Dime planchet w/PCGS Tag "scratch or Rim Nick". Otherwise X.F. A popular Date Off-Metal. Nick". Otherwise X.F. A popular Date Off-Metal.	\$2,750

<p>1975-80's German 2 Pfenning Punched Planchet Strip This is a very scarce and unusual Bronze-Clad-Steel magnetic punched planchet strip. This strip shows the "Punch/Tear" marks inside the holes of the strip, and because it is bronze-clad-steel, you can see the two different metals on the outside strip itself, and inside the punched holes. These are from approximately 1975-1985, and are an excellent educational tool to illustrate the minting process. The measurement of this strip is a large 5" x 4". Buy one of each Denomination strip @ for \$100</p>	\$40/ea.
<p>1975-80's German 5 Pfenning Punched Planchet Strip The second scarce and unusual Brass Plated Magnetic Steel punched planchet strip, or "webbing" for German 5 Pfennig This strip shows the "Punch/Tear" marks inside the punched holes. These are from approximately 1975-1985, and are an excellent educational tool to illustrate the minting process. Size of strip 5" x 5". Buy 1 of each Denom. strip for /\$100</p>	\$40/ea.
<p>1975-80's German 10 Pfenning Punched Planchet Strip A third scarce and unusual Brass Plated Magnetic Steel punched planchet strip, or "webbing" for German 5 Pfennig This strip shows the "Punch/Tear" marks inside the punched holes. These are from approximately 1975-1985, and are an excellent educational tool to illustrate the minting process. Size of strip 5.5" x 6". Buy 1 of each Denom. strip for \$100</p>	\$40/ea.

<p>COINAGE DIES--Cancelled U.S. Mint Olympic Coin Dies</p> <p>There are four basic types of "Out of Use" Dies. (See the June 2002 issue of "Coinage" for more information.)</p> <p>"Torched"-The face of the die is melted into "Blobs". Seen in the 1968-S/1969-S</p> <p>Dies sold as scrap in the San Francisco area in the late 1960's. Surface of the Die looks like "Lava"</p> <p>"Defaced"-The face of the Die is ground off flat. These are the dies I sell from the Denver Mint, and are the same type of Dies sold by the U.S. Mint in 1998, and since 1999 for States Quarter Dies only.</p> <p>"Cancelled" - The face of the die is "X"d across the die, leaving four quadrants of design showing. Some old rare U.S. Dies are found like this, plus the one-time-only sale in 1997 of the 1996 U.S. Olympic Proof & Unc. \$1 & \$5 Gold Dies.</p> <p>"Unmarked" or "Uncancelled" - The rarest of Dies, and considered illegal to own if it's a modern U.S. Coinage Die!!</p>

<p>1878 Liberty Quarter PCGS MS-60 Uncentered Broadstrike (Looks O/C).Very Scarce Type coin.</p>	\$950
<p>1907-S Barber Quarter PCGS AU-58 Struck 5% Off-Center @ 11:00. Much, much rarer than a Barber Dime. Rare Semi Key Date & PQ.</p>	\$3,200
<p>1927-D Standing Liberty 25c PCGS MS-65 Full Head Retained Cud @ 12:00 (Not noted on holder). This coin has a strong Retained Cud from the rim just to the right of "B" thru Liberty's head, to the rim at the left side of the "E". (Normal Trends \$3,000)</p>	\$3,000
<p>1941 Washington Quarter PCGS AU-55 Unique-100% Uniface Strike Reverse. This 1941 Quarter had a second planchet in the collar when struck. It's the earliest date I've ever seen, or heard of with this type of Error.</p>	\$2,900

Fred Weinberg's Price List of Major Mint Errors & Currency

<p>1943-S Washington Quarter NGC MS-64 Superb!- Struck on a Silver War Nickel planchet. Many times Rarer than a Nickel on Steel Cent, this Extremely Rare Fully-Dated Off-Metal San Francisco Quarter is without a doubt the finest known Quarter on a Silver War Nickel! PQ & Lustrous</p>	\$15,000
<p>1954 Washington Quarter NGC MS-63 Struck on a Nickel planchet. Full strong date-- Scarce.</p>	\$2,350
<p>1959 Washington Quarter PCGS MS-65 Struck on a Nickel planchet. Semi P.L -Full date. Scarce.</p>	\$850
<p>1961 Washington Quarter PCGS MS-63BN Struck on a Cent plan. Top 3/4 of date shows-Rare Earlier Date.</p>	\$1,500
<p>(1962) N.D. Washington Quarter PCGS AU-58 Struck on Korea 10 Hwan plan. (Tag Reads). Looks like it is on a cent plan., this 38 gr. Plan. is 95% CU-5% ZI. A very Rare Country for a U.S. coin to be struck on, and 1st I've seen in over 20-25 yrs.</p>	\$800
<p>1964 Washington Quarter NGC MS-64 Struck on a Silver Dime planchet Full strong date. Semi P.L.</p>	\$2,200
<p>1964-D Washington Quarter NGC AU-58 Struck on a Nickel planchet (Slight Double Strike at date).</p>	\$450
<p>1964-D Washington Quarter PCGS MS-64 Struck on a Nickel planchet. Full Date & very lustrous & PQ.</p>	\$700
<p>N.D. "D" Washington Quarter PCGS MS-62 Struck on a Silver Dime. Only "D" Mintmark shows.</p>	\$650
<p>N.D. Washington Quarter PCGS MS-63 Struck on a Silver Dime planchet. PQ Luster! (2-A)</p>	\$725
<p>N.D. Silver Washington Quarter PCGS MS-64 Unique-Incredible Struck on a 1.5 gram/23 grains Silver Bow-Tie planchet. One of the most Dramatic planchet Errors I've seen. This coin first appeared in the early 1970's I believe, and we are offering it for the first time since then. "Straight End Plan.-Bow-Tie"</p>	\$4,750
<p>1965 Silver Washington Quarter PCGS MS-62 Rare Transitional-Struck on a Silver Dime planchet. I purchased this coin directly from a Brinks ex-employee in the mid-west, who found it in 1965. This Rare Transitional wrong planchet certainly looks MS-64 with great bright luster and flash. This coin is also the best I've seen with a 100% full strong date, not a partial, or 25% of the date showing as most.</p>	\$13,000

Fred Weinberg's Price List of Major Mint Errors & Currency

<p>1966 Washington Quarter NGC MS-64 Struck on a Clad Dime planchet. Full date (Double Struck @ 6:00).</p>	\$650
<p>1966 Washington Quarter PCGS MS-65 Struck on a Clad Dime planchet. Only top half of date shows.</p>	\$475
<p>1968-D Washington Quarter PCGS AU-58 Struck on a Nickel planchet. Scarce Date/Mintmark.</p>	\$400
<p>1970-S Washington Quarter PCGS PROOF-66 Cameo Proof-Double Struck in Collar and Clashed Dies. A fantastic looking coin. This PROOF Quarter Double Struck and Rotated approx. 20 degrees, but both dates/mintmark show. This coin also has the strongest Die Clashes I've ever seen on a quarter. So strong it looks like a flipped-over third strike.</p>	\$4,250
<p>1974-D Washington Quarter PCGS MS-63 Struck on a Copper Cent plan. Full date shows & full-flaming red.</p>	\$1,400
<p>1976-D Bi-Centennial Quarter PCGS MS-63 Wire struck into Reverse. A large 1" piece of wire struck into reverse with about 1/2 lifted off surface. Very rare, dramatic, and unusual.</p>	\$1,100
<p>1981-P Washington Quarter PCGS AU-58 Rare 30c Piece-Double Denomination on a Struck 1981 Nickel This 1981-P Washington Quarter was struck on a flipped over, previously struck 1981 Jefferson Nickel. Due to the hardness of the nickel planchet there are not many details that show from the under-struck nickel. Some details that are visible are as follows: (1) Above the words "OF" on the reverse, is the full distinct "FS" of the nickel designers initials, and the bottom of Jefferson's shirt line. (2) Remnants of the 1981 Nickel date are weak, but seen under "D STAT" of United States. (3) Parts of "America", especially "RICA" shows above "IN of In God We Trust. (4) The right outline of the Monticello building. (5) The "E P" from E Pluribus shows @ 3:00 obv. (6) Part of the left Monticello building shows at the top of Washington's head. Thirty-Cent Pieces are Truly "RARE"</p>	\$2,850
<p>N.D.Washington Quarter (Pre '82 Cop) PCGS MS-62Red Incredible! Struck 35% Off-Center @ 8:00 on Type-I Copper CENT planchet! There are hints of multi strikes on this "Stretch Strike" O/C. 2-3 Ghost images of Washington's head. Uniface reverse. Rare!</p>	\$3,600
<p>N.D. Washington Quarter (Pre '82 Cop) PCGS MS-66 Struck on 3.1gm Cent plan (Tag Reads). No date shows, but comes w/2 x 2 that reads "Freak out of Mint Sealed 1964-P bag".</p>	\$1,250

Fred Weinberg's Price List of Major Mint Errors & Currency

1993 Washington Quarter PCGS MS-64 Struck 5 Times on Aluminum Feeder Finger Tip (Tag Reads). A large Aluminum Feeder Finger fragment with @ least 5 Washington heads, etc showing. This is the earliest date F.F. known of any denomination.	\$3,500
1995-D Washington Quarter PCGS AU-55 Reverse Clad Layer Missing--Looks B.U. to me.	\$120
1998 Washington Quarter NGC MS-64 Struck 25% Off-Center @ 11:00 & 25% clip @ 5:00. Very dramatic!	\$475
N.D. Washington Quarter PCGS MS-63 Struck on a Clad Dime planchet.	\$375
1999 STATE QUARTER ERRORS

1891-O Morgan Dollar NCS Fine Details Struck 15% Off-Center @ 12:00. Improperly cleaned, this is still a very scarce <u>New Orleans</u> Morgan Dollar. The obverse has no problems, but the reverse has numerous dark areas.	\$2,850
1899-S Morgan Dollar NGC AU-53 Partial Collar Strike in New NGC "See Edge" holder. Scarce Date.	\$375
1921 Morgan Dollar PCGS MS-63 Unique-Struck 5% Off-Center and Clashed Dies Reverse. This PQ 5% O/C Dollar is also VAM 40-A "Pyramid Rev Die Clash" below tail feathers. A great coin that combines grade, appearance, off-center strike, and a high grade. Scarce VAM- UNIQUE	\$5,750
1921 Morgan Dollar NGC MS-64 Curved Clip planchet @ 9:00. PQ Luster and surfaces.	\$150

Fred Weinberg's Price List of Major Mint Errors & Currency

N.D. New Orleans Morgan Dollar PCGS XF-45 Struck 25% Off-center @ 6:00. Morgan dollars struck this far off-center are excessively rare. This coin is from the New Orleans Mint, and who's scarcity for Errors is compensated for the lack of date showing on a Silver Dollar strike this far off-center.	\$11,500
1923 Peace Dollar NGC MS-64 Curved Clip @ 11:30. A nice creamy, brilliant, luster. High Grade.	\$125
N.D. Morgan/Peace Dollar PCGS MS-61 T-I (No Rim) Silver Blank planchet. Very rare. (2-A)	\$1,750
N.D. Morgan/Peace Dollar PCGS MS-61 T-II (Upset Rim) Silver Blank planchet. Very rare. (2-A)	\$1,500
Buy T-I and T-II Blank Silver Dollar planchets as a set for \$2,900 (Both PCGS MS-61)	
1988 \$1 Am. Silver Eagle New ANACS CACHE MS-69 Full Partial Collar strike "Railroad Rim". Very scarce on American \$1 Silver Eagle. It looks like it is on a Type-I blank.	\$475
Ike and Susan B. Anthony Dollars	
1971-D Ike Dollar PCGS AU-58 Struck on a <i>Clad Half Dollar</i> planchet. Scarce with date.	\$2,800
1972-D Ike Dollar PCGS MS-63 Struck on a Philippine <i>1 Piso</i> plan. A much scarcer date than the 1974-D, this coin shows almost a full date (ANACS MS-65 Tag)	\$1,350
197x Ike Dollar PCGS MS-64 Struck 30% Off-Center @ 3:00. Rare this far O/C (AC MS-65 Tag)	\$2,750
N.D. "D" Ike Dollar PCGS MS-62 Struck on a <i>Clad Half Dollar</i> planchet.(2-A)	\$2,800
N.D. "D" Ike Dollar (1971 TYPE) PCGS MS-64 Struck on a <i>Half Dollar</i> planchet.	\$3,100
N.D. Ike Dollar PCGS MS-65 Struck on a <i>Clad Half Dollar</i> plan.(after 1973 Type)Highest grade.	\$3,500
1979 Susan B. Anthony Dollar PCGS MS-63 Struck on a <i>Quarter</i> planchet. Very frosty & lustrous.	\$1,200
1980-S Susan B. Anthony Dollar PCGS MS-62 Obverse Clad Layer Missing. Scarcer than prior years. Nice Red.	\$375
N.D. Susan B. Anthony PCGS MS-65Red Struck on a <i>Cent</i> planchet. A beautiful Gem with great original luster. We recently sold an AU-58 for \$6,250.	\$7,500
1999 Susan B. Anthony Dollar PCGS MS-63 Struck on a <i>Quarter</i> planchet. Only 7 or 8 known of this date.	\$1,500

Fred Weinberg's Price List of Major Mint Errors & Currency

1999 Susan B. Anthony Dollar PCGS MS-64 Double Struck-second strike 85% off-center @ 11:00. DSBS.	\$1,100
SACAGAWEA DOLLARS	
(2000) Sacagawea Dollar (s) PCGS MS-61 Blank planchet Type-II (Tag reads "2000")	\$300
N.D. Sacagawea Dollar (s) PCGS MS-61 Blank planchet Type-II. With Upset Rim.	\$135
2000 Sacagawea Dollar PCGS MS-63 Reverse Manganese Layer missing. Full Red. Scarce.	\$700
2000 Sacagawea Dollar PCGS MS-64 <i>Double Denomination on a Struck Maryland Quarter.</i> Very strong detail shows on both sides & full quarter date shows @ 12:00 obv.	\$4,800
2000 Sacagawea Dollar PCGS MS-64 <i>Double Denomination on a Struck Maryland Quarter.</i> Another nice example, but flipped over. Strong good detail on both sides.	\$4,800
2000 Sacagawea Dollar NGC MS-65 <i>Double Denomination on a struck Maryland Quarter.</i> (Flipped-over). Also good details shows including quarter date @ 9:00 obverse.	\$4,800

<p>2005 Malaysia 10 Sen PCGS MS-66 Muled with 1 Sen Obv Die (Tag Reads). (2-A)</p>	\$425
<p>2005 Malaysia 1 Sen PCGS MS-64 Struck on a larger 20 Sen coin (Tag Reads). A dramatic overstrike onto a larger previously struck coin.</p>	\$375
<p>2005 Malaysia 10 Sen PCGS MS-65 Struck on a larger 20 Sen coin (Tag Reads).</p>	\$425
<p>2005 Malaysia 10 Sen PCGS MS-64 Struck on a larger 20 Sen Plan (Tag Reads). A perfect 10 Sen strike in the middle of a larger 20 Sen Blank planchet.</p>	\$350
<p>2005 Malaysia 20 Sen PCGS MS-65 Overstruck with 10 Sen Dies (Tag Reads). A great "Double Denomination" you can see both the full 10 & 20 Sen + 2005 Dates.</p>	\$550
<p>2005 Malaysia 20 Sen PCGS MS-64 Struck Eleven Times-10 Strikes O/C (Tag Reads). A dramatic "Step-ladder" Multi -Struck coin.</p>	\$275
<p>2006 Malaysia 20 Sen PCGS MS-62 Struck on a larger 50 Sen Blank. A perfect 20 Sen strike in the middle of a larger 50 Sen Blank planchet.</p>	\$375

Fred Weinberg's Price List of Major Mint Errors & Currency

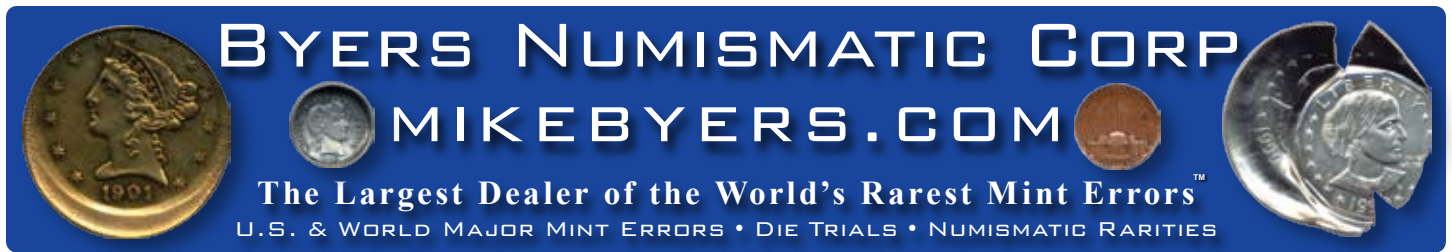

<p>2006 Malaysia 20 Sen PCGS MS-64 Struck 50% Off-Center on 2005 20 Sen (Tag Reads). Both dates are easily seen on this Double Struck Dual-Dated coin.</p>	\$575
<p>UNIQUE-Clock Set of Fold-Over Lincoln Cents Offered publicly for the first time, we are proud to offer the <i>only known</i> 12 pc. Clock Set of Fold-Over Strike Lincoln Cents. In a custom plastic holder, each Fold-Over cent is in its' own clock position. There are four Pre-'82 Copper Fold-Over's, one Double Struck Fold-Over, and the remaining cents are on post-1983 Zinc planchets. This type of Error is now impossible to occur with the new Shuler Presses. This unique set at one time had a thin chain that was actually strung through the looped part of the Fold-Over cents! We are certain that it is impossible to ever assemble even half a set like this again. Unique & Dramatic.</p>	\$11,500
<p style="text-align: center;">1974 U.S. Gas Ration Coupon 1 Unit Gasoline</p> <p>The famous never-released Gas Coupons that were destroyed by the Treasury Dept. at the U.S. Army Depot in Colorado. A Study of World Mis-Struck Coins

by Bill Snyder - worlderrors.com

Editor's Note: This is the fifth in a series of charts to be published in Mint Error News Magazine which were compiled by Bill Snyder of worlderrors.com. He undertook a study to painstakingly research and compile a list of known errors from major world countries. The chart below covers India striking errors through 1994.

Bill states that "this study will determine which types of mis-strikes were common or rare, by country and time period. The study was limited to major striking errors such as double strikes, off-centers, brockages, etc."

Country	Type of Error	Date	Amount	Denom	Specifics
India	Brockage-O	(Early)	1	Rupee(s)	India. Sept 1904 Circular #7910.
India	Brockage-R	1000-1500?		-	"Medieval"
India	Brockage	1795 ca	1	Pice	"Quarter size copper."
India	Off Center	1802-1829	1/2	Pice	"Bombay; obv ca 40%o/c".
India	Two Rev Dies	1804	2	Pice	Bombay Presidency.
India	Off Center	1830	1/4	Anna(s)	
India	Brockage	1833 ca	1/4	Anna(s)	"C867"
India	Brockage-O	1834	1	Anna	
India	Brockage-O	1835	1	Rupee(s)	"William III rupee brockage."
India	Brockage-O	1835	1	Rupee(s)	William III. Strong obv, but cleaned. Later strike.
India	Brockage-R	1835	1/2	Anna(s)	
India	Brockage	1835	1/4	Anna(s)	"East India Co.".
India	Brockage-O	1835	1/4	Anna	Early stage full brockage.
India	Brockage-R	1835 (nd)	1/4	Anna(s)	Incuse side is 10% o/c K-8. (Mid-stage brockage).
India	Brockage-O	1835 ca	1	Rupee(s)	"F incuse on truncation. Toned, extremely fine."
India	Brockage-O	1835 ca	1	Rupee(s)	Wm IV. (sold with a post-1862 Victoria obv brockage rupee)
India	Brockage-O	1840	1	Rupee(s)	Continuous legend type. Toned. (Lite scratches on incuse neck).
India	Brockage-O	1840	1	Rupee(s)	
India	Brockage-O	1840	1	Rupee(s)	"EK" (edge knocks)
India	Brockage-O	1840	1	Rupee(s)	Split legend type. D/S (Doubled legend/bust, mostly on incuse side).
India	Brockage-O	1840	1/4	Rupee(s)	Young head Victoria. Middle state (beginning to spread).
India	Brockage-O	1845	1/2	Anna(s)	Green corrosion ruins 1/2 of raised side (K-11 to K-5).
India	Brockage-O	1845	1/2	Anna(s)	"without serif on numeral 4."
India	Brockage-R	1853 ca	1/2	Pice	One year type.
India	Off Center	1858	1/4	Anna(s)	"SBA size copper."
India	Double Strike	1862	1	Rupee(s)	"2nd strike 40% o/c giving 2 heads, etc."
India	Double Strike	1862	1/2	Anna(s)	"2nd 25% o/c K-1 super nice."

Country	Type of Error	Date	Amount	Denom	Specifics
India	Brockage-O	1862	1/2	Pice	
India	Off Center	1862	1/2	Anna	10% o/c K-9. Centers fairly strong, but nearly no legend.
India	Off Center	1862	1/4	Rupee(s)	"3mm o/c."
India	Off Center	1862	1/4	Anna(s)	
India	Double Strike	1862	1/4	Anna(s)	2nd strike is 20% o/c K-4. Rev legend weak in center.
India	Off Center	1862	1/4	Anna	15% o/c K-11. "red Unc"
India	Broad Strike	1862	2	Anna(s)	Silver. Centered broadstrike.
India	Brockage-O	1862 (nd)	1/2	Pice	"Queen".
India	Brockage-O	1862 (nd)	1/2	Pice	"Title as Queen."
India	Brockage-O	1862-1876	1	Rupee(s)	Sold with 8 other mis-strikes.
India	Brockage-O	1862-1876	1	Rupee(s)	
India	Brockage-O	1862-1876	1	Rupee(s)	
India	Brockage-O	1862-1876	1	Rupee(s)	Y-12 as KM-473.1, cleaned.
India	Brockage-O	1862-1876	1	Rupee(s)	"Victoria Queen".
India	Brockage-O	1862-1876	1	Rupee(s)	Sold with a VF "Victoria Empress" obv brockage.
India	Brockage-O	1862-1876	1	Rupee(s)	"Victoria Queen". Tilted partial collar.
India	Brockage-O	1862-1876	1	Rupee(s)	India. Sept 1904 Circular #7911.
India	Brockage-O	1862-1876	1	Rupee(s)	"Victoria Queen"
India	Brockage-O	1862-1876	1	Rupee(s)	"Victoria Queen". Holed at K-12.
India	Brockage-O	1862-1876	1	Rupee(s)	Holed.
India	Brockage-O	1862-1876	1	Rupee(s)	
India	Brockage-O	1862-1876	1	Rupee(s)	Offered in a group of 4 brockages.

Fred Weinberg & Co.

Dealer in Major Mint Error Coins & Currency

fredweinberg.com

BUYING MAJOR ERROR COINS & CURRENCY

If you have a single major mint error coin, either a recent issue or an older type coin, or 1,000 Off-Center Cents, please contact us. We stock over 60,000 Major Mint Error Coins and constantly need to purchase Major Error Coins for our clientele (please note that we do not deal in or buy Die Varieties, Damaged Coins, Doubled Dies, Filled Dies, or Die Cracks).

We do buy Major Mint Errors - such as Off-Center, Off-Metals, Double Strikes, Clad Layers missing, Die Caps, Double Denomination, etc.

Because of the many differences in each Error Coin we request that you send scans of your coin(s) to us for our examination and firm offer.

ERROR WORLD

Join the *hottest*
Error Coin Club on the Net!

e r r o r w o r l d c l u b . o r g

The Error World on-line coin club exists for the purpose of advancing the knowledge and the field of error coin collecting.

Error World is dedicated to the promotion, discussion and dissemination of facts and ideas about error coinage, both domestic and world-wide.

Error World exists as a vehicle to bring collectors of both foreign and domestic error coinage together in a professional and relaxed atmosphere where they can exchange information, display photos and engage in lively debate about error coinage.

Error World is a non-profit organization with all revenues being put back into the club to provide improved services to the members of the club.

Error World will, from time to time, accept contributions from designated Patrons in the form of contest prizes, and/or cash to be used to defray club expenses.

Error World will, from time to time, attempt to obtain sponsors from the numismatic field who will bring price saving offers to Error World members.

Frequently Asked Questions

What are “struck on core” errors?

There are only three U.S. coins known that are struck on a core planchet. The core is the center strip of metal in the planchet that can be viewed on a clad dime, quarter or half by turning the coin on its side. To date, there is only one clad dime, quarter and half struck on the center core.

This quarter was certified by PCGS MS 63. This is a spectacular major mint error and a unique discovery coin. It is the only known U.S. Quarter (pre-state or state) struck on the pure copper core. It is multiple struck, uniface, expanded to the size of a Half Dollar and has a reeded edge. It is in choice mint state condition and has an attractive red and brown color.

Frequently Asked Questions

What are impossible errors?

An “impossible mint error” is a phrase used by mint error dealers and collectors to describe a mint error that defies logic and boggles the mind as to its method of manufacture, whether it was assisted or not and how it could have credibly occurred during the normal production of coinage. The following “impossible error” appears to have been struck as a legitimate mint error but several anomalies occurred in its production.

This mint error started as a Lincoln Cent which was a deep obverse die cap. Instead of being caught and discarded by the Riddlers and destroyed as a mint error, it was subsequently struck by a Roosevelt Dime obverse die. It then became an obverse die cap and took the shape of the obverse Dime die. This unique dual denomination dual cap off-metal is in Gem Mint State condition with blazing red color.
