MINT ERROR NEWSTM MAGAZINE

Bringing the latest mint error news to the collector. Also featuring Die Trials, Test Pieces, Numismatic Rarities, Currency Errors and Discoveries from the U.S. Mint & the BEP.

Mike Byers, Publisher & Editor, Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our fifth year bringing you both a print magazine and an online PDF magazine. There are now over 550 articles, features, discoveries, news stories with mint error related info from the United States and around the World. Minterrornews.com has become the most popular and informative Internet resource for mint errors and is read by thousands of dealers and collectors.

Mint Error News was originally sponsored by Mike Byers and ANACS. Due to the popularity of mint errors and the magazine it is now sponsored by Mike Byers and several other mint error dealers including Allan Levy (alscoins.com) and Fred Weinberg (fredweinberg.com). Mike Byers is the Publisher and Editor of Mint Error News Magazine.

Mike Byers (mikebyers.com) has been a Professional Numismatist since 1978. He is the largest dealer of the world's rarest mint errors. He specializes in U.S. and World Major Mint Errors and Die Trials. His new discoveries of major mint errors have been front page news for years. He is a life member of ANA since 1985, a charter member of NGC and a featured dealer/member of PCGS.

He is a founder member of the California Coin & Precious Metals Association. He is also a life member of the Central States Numismatic Society, the Florida United Numismatists and a member of ICTA. He is member A71 in the Certified Coin Exchange (CCE). Mike Byers was a Consultant for ANACS for Mint Errors from 2000 through 2006.

Allan Levy has been specializing in Mint and Currency Errors for 25 years. His website features a diverse group of type errors, modern errors and major currency errors. He also handles regular U.S. and World coins. Allan Levy is a member of CONECA and the American Numismatic Association.

Fred Weinberg is the President of Pacific Rim Numismatics (DBA Fred Weinberg & Co.). He is a highly respected numismatist, with 35 years of full time experience in the rare coin marketplace. His professional associations include the American Numismatic Association (ANA) (38 years), the Professional Numismatist Guild (PNG) (31 years), The Industry Council for Tangible Assets (ICTA) (21 years) and The Numismatic Literary Guild. He is a past President of the Professional Numismatist Guild (1999-2001).

Additional sponsors of Mint Error News are Heritage Auction Galleries, CoinLink, CoinFacts.com, uspatterns.com and errorworldclub.org. We encourage collectors and dealers to submit articles and photos of major mint errors that we may feature on the website.

Off-Center Mint Error Sales

by Al Levy (alscoins.com)

Here are records of recent sales of off-center mint errors on eBay:

1. All coins were listed on eBay and closed from January 1, 2008 to March 31, 2008.
2. All lots had buyers. If the coins actually changed hands is unknown.
3. A picture accompanied each lot or it was not recognized.
4. Mislabeled items were ignored.
5. Some lots may have changed hands more than once.

6. "D" next to the date symbolizes that the coin had damage or was scratched.

7. "C" next to the date symbolizes that the coin was cleaned.

8. "B" next to the date symbolizes that the coin had damage and was cleaned.

9. If the date or mint mark was missing or partially visible, parentheses were used.

10. Postage/handling/insurance fees were ignored.

11. Major auctions were not listed.

Saul Teichman's Want List

I am looking for the following off-metal errors:

Wartime Nickel on a copper cent planchet

Bicentennial Half on a copper cent planchet

Bicentennial Half on a dime planchet

Kennedy Half on a Sacagawea dollar planchet - if it exists

Ike Dollar on a nickel 5 cent planchet

Ike Dollar on a quarter planchet

Sacagawea Dollar on a cent planchet - if it exists

Sacagawea Dollar on a nickel 5 cent planchet

Sacagawea Dollar on a dime planchet - if it exists

Double Denomination & Off-Metal Mint Error Sales

by Al Levy (alscoins.com)

HERE ARE RECORDS OF RECENT SALES OF DOUBLE DENOMINATION & OFF-METAL MINT ERRORS ON EBAY FROM JANUARY 1, 2008 TO MARCH 31, 2008.

1. ALL LOTS HAD BUYERS. IF THE COINS ACTUALLY CHANGED HANDS IS UNKNOWN.
2. A PICTURE ACCOMPANIED EACH LOT OR IT WAS NOT RECOGNIZED.
3. BLURRY PICTURES OR OTHER PROBLEMS ARE NOTATED UNDER "OBSERVATION".
4. ITEMS MISLABELLED COMMANDED A SMALL PREMIUM.
5. SOME LOTS CHANGED HANDS MORE THAN ONCE.
6. ANY SCRATCHES, DENTS OR DEFECTS NOTATED WERE EITHER IN THE DESCRIPTION OR GRADING SERVICES' HOLDERS.
7. AUCTION HOUSES THAT LISTED THESE ERRORS WERE IGNORED.
8. SHIPPING CHARGES ARE NOT INCLUDED.

DESCRIPTION	GRADED	SOLD	OBSERVATION
DOUBLE DENOMINATIONS

Buffalo Nickel “Speared Bison” & Wisconsin Quarter “Extra Leaves”

by Al Levy (alscoins.com)

PLEASE NOTE: THE ERROR TYPES LISTED BELOW WERE EBAY LOTS THAT CLOSED WITH A HIGH BIDDER. IF THE RESERVE PRICE WAS NOT MET, OR PICTURE WAS NOT ATTACHED, THEN I IGNORED THE AUCTION. FUZZY PICTURES, OR QUESTIONABLE DESCRIPTIONS ARE NOT INCLUDED.

AN IMPORTANT OBSERVATION ABOUT THE BUFFALO 5c “SPEARED BISON” & THE “WISCONSIN” 25c EXTRA LEAFS ARE EBAY ITEMS ONLY. DEALERS ARE STOCKING AND SELLING THESE AT SHOWS. PRICES HAVE TAKEN A MAJOR DOWNTURN. DEMAND HAS DIMINISHED GREATLY FOR THE SPEARED BISON. THE MAJORITY OF LISTED COINS REMAINED UNSOLD. EXTRA LEAFS HAVE GONE DOWN IN PRICE AS MORE ENTERED THE MARKET.

THE HIGH LEAF IS SCARCER THAN THE LOW LEAF. CHECK OUT THE SALES TOTALS AS BOTH VARIETIES ARE ABOUT THE SAME IN QUANTITIES. STILL VERY ACTIVELY TRADED.

END OF ROLL COINS. COLLECTORS NEED TO KNOW THAT THERE IS A MACHINE ON THE MARKET THAT WILL ALLOW ANYONE TO ROLL YOUR OWN COINS. IT IS A CRIMPING MACHINE TO BE USED WITH PRE-CRIMPED (SHOTGUN SHELL) STYLE WRAPPERS. BUYER BEWARE!!!

HERE ARE RECORDS OF RECENT SALES ON EBAY FROM JANUARY 1, 2008 TO MARCH 31, 2008.

New 2007 Mint Errors

by Mike Byers (mikebyers.com)

There have only been a few major mint errors discovered in 2007 other than the missing edge lettering errors on the Presidential Dollar series.

Elliptical clips (coins struck on elliptical planchets) have been found on almost every state quarter struck so far. This **proof** Utah State Quarter is unique and spectacular for several reasons. It is the only State Quarter known that is struck on an elliptical planchet in **proof** and also claims the distinction of being the **only known** U.S. proof coin on any denomination that was struck on an elliptical planchet.

©mikebyers.com

New 2007 Mint Errors

Here is an exciting 2007 Denver Dime multi-struck on Aluminum scrap (the tip of the feeder finger). It weighs 12 grains and is the size of a U.S. Half Dollar.

©fredweinberg.com

New 2007 Mint Errors

Several Presidential Dollars are known that were struck on misaligned, or horizontally misaligned dies. This Proof Madison Dollar was struck with misaligned dies and also has a partial collar.

©mikebyers.com

New 2007 Mint Errors

The first full die cap I've seen that is dated after 1999! This coin is larger in diameter than a 50¢ and a very deep obverse cap. Wyoming reverse design shows.

©fredweinberg.com

New 2007 Mint Errors

This Jefferson Dollar was double struck with rotation. Dramatic doubled torch, arm, SOL, head/profile, etc., + doubled nose/mouth obv. Two known.

©fredweinberg.com

New 2007 Mint Errors

Double Struck-1st Strike Off-Center. Similar to other T. Jefferson NGC PF-69 Ultra Proof listed, but more dramatic. Off-Center first strike elements ALSO seen on rim from 3:00-5:00.

©fredweinberg.com

New 2007 Mint Errors

Struck Six Times -Broadstruck & Missing Edge Lettering. The 2nd-6th strikes are 10% off-center, and missing the entire edge lettering process due to it being larger in diameter than a normal \$1.

©fredweinberg.com

New 2007 Mint Errors

Defective Obverse Manganese Layer & Missing Edge Lettering. A very large “void” @ 3:00 obv. This coin is also one of the very scarce Missing Edge Lettering Jefferson \$1's & is UNIQUE.

©fredweinberg.com

New 2007 Mint Errors

Reverse Manganese Layer Missing-Missing Edge Lettering. Flaming Red Reverse. Two known.

©fredweinberg.com

New 2007 Mint Errors

Struck Four Times Broadstruck & Missing Edge Lettering. 2nd-3rd & 4th strikes are close overlaps approx. 5%-10% O/C, and same as above the coin is also Missing Edge Lettering.

©fredweinberg.com

New 2007 Mint Errors

Overlapped Double Strike & Broadstruck. Missing Edge Lettering.
A close overlapped Double Strike, but largely Broadstruck 2nd strike,
and Missing Edge Lettering due to large planchet size.

©fredweinberg.com

New 2007 Mint Errors

Obverse Manganese Layer Missing-Missing Edge Lettering. UNIQUE-Beautiful full red copper core obverse. Only the second known Missing Edge Lettering Madison Dollar.

©fredweinberg.com

New 2007 Mint Errors

This Jefferson Dollar has the Obverse Manganese Layer Missing and has Missing Edge Lettering. A great combo error. Very scarce Missing Edge Lettering combined with a copper core obverse!

©fredweinberg.com

New 2007 Mint Errors

This Jefferson Dollar has the Reverse Manganese Layer Missing and has Missing Edge Lettering. Beautiful Double Error & good mate to the obverse missing Manganese Jefferson Dollar listed.

©fredweinberg.com

World Errors

by Allan Levy

Recently, I purchased a world collection of major mint errors. Here are a few of the more dramatic ones:

1969 50 Pence struck on a 1968 Bahamas 10c

Great Britain 2000 50 Pence Struck on 5 Pence Blank

Mexico Coin Missing Center Core

World Errors

Mexico 1975 Double Struck

Brazil 1967 2c Obverse Die Cap

S. Africa (1991) 1R Struck on a 1c Planchet

World Errors

Mexico 1988 5000P Struck on a 500P Planchet

New Zealand 1989 5c Struck on Wrong Planchet

S. Africa 1991 5c Struck on a 10c Planchet

World Errors

Mexico 1989 1000P Struck on a Wrong Planchet

Venezuela 1989 2B Struck on a 1B Planchet

Yugoslavia 1981 10D Struck on a 5D Planchet

World Errors

Yugoslavia 1984 2P Struck on a 1D Planchet

Brazil 1969 2c Struck on a 1c Planchet

Brazil 1969 5c Struck on a 2c Planchet

World Errors

Peru 1986 20c Struck on a 10c Planchet

Presidential \$1 Error Coins: James Monroe

By Dave Camire (NGC & NCS)

This article is part of our series on Presidential Error Coins, and focuses on the 2008 James Monroe Dollar.

There is no doubting that a great number of collectors continue to search through rolls of Presidential Dollars looking for error coins. Take, for example, this evidence: the coins were released on February 14, 2008, and NGC has already received a handful of submissions of error coins. While the earliest issues of the series were found without edge lettering, the more recent issues do not exhibit this error in abundance (if at all).

Photo #1. An edge lettered Monroe \$1 blank planchet.

Instead, NGC is seeing different sorts of errors, which are as a general rule much more scarce. For example, NGC has certified a few James Monroe \$1 edge lettered planchets. These are coin blanks (technically planchets), prepped for minting, that were never struck but passed through the edge lettering machine only. Depending on the settings of the edge lettering machine, this can result in a few possible outcomes, the most desirable of which is a “blank coin” showing full edge lettering.

If they're not struck, how do we know that these coins are James Monroe dollars? Simple. The date 2008 appears as part of the edge lettering, and these coins were released early in the year. The next coin in the series that will be dated 2008 is the John Quincy Adams, and that coin is scheduled for release on May 15. Until that coin is released, NGC can designate 2008 edge lettered dollar planchets as (JAMES MONROE). After the release of the John Quincy Adams dollars, edge lettered planchets dated 2008 will not be attributed by President at NGC. Thus, only the first coin issued each year is eligible for such attribution.

Photo #2. This segmented image of an edge lettered Monroe \$1 blank planchet shows an exploded edge view, and the edge lettering is visible.

Edge lettered planchets essentially come in two varieties, fully edge lettered and partially edge lettered. Edge lettering is weak on all edge lettered planchets because they have not been struck to their full diameter (as constrained by the collar). After upsetting, the planchets are fractionally smaller in diameter than their final struck dimensions. Because of their smaller size, the edge lettering is applied under less pressure and can be weak. This may also cause the edge lettering to be only partial. Alternatively, a planchet can get hung-up in the edge lettering machine, and only partial lettering may be imparted. This type of partial edge lettering has been seen on a number of struck Presidential \$1 Coins.

Presidential \$1 Error Coins: James Monroe

In addition to the errors previously described, NGC has also certified a Monroe \$1 Coin missing clad layer.

Photo #3a. The date portion of edge lettering on a Monroe \$1 planchet.

Photo #3b. A portion of edge legend on a Monroe \$1 planchet. WE of IN GOD WE TRUST is clearly visible.

Photo #4. An NGC-certified 2008 P (JAMES MONROE) \$1 EDGE LETTERED PLANCHET.

Photo #5. An NGC-certified 2008 (JAMES MONROE) \$1 PARTIALLY EDGE LETTERED PLANCHET. The mint mark is not visible on this example, and therefore this information is not included on the certification label.

Presidential \$1 Error Coins: James Monroe

Presidential dollars are composed of the same three-part clad layers as the Sacagawea dollars. Planchets missing an outer layer show one side in rich copper color, as the pure copper center of the coin is exposed. This bright red is a sharp contrast to the “golden” appearance on the other side of the coin, adding to the

drama of this error. Because coins missing a clad layer are thinner than normal planchets, they show weakness in the design especially along the edge of the coin.

Stay tuned for updates and NGC articles on other coins in this series.

Photo #6a. The obverse of this Monroe \$1 is missing its outer clad layer and shows the rich copper color of its core.

Photos #6b. The reverse of this Monroe \$1, missing obverse clad layer, shows characteristic weakness around its rims.

Dual Dated Double Denomination Errors

by Rich Schemmer (richerrors.com)

Many error collectors and dealers alike are unaware of the dual dated double denomination error. That is how very rare they are. There are approximately twenty examples known for all combined dates & denominations, including any double denomination error with two different dates, such as a 1999 Cent struck over a struck 1998 Dime.

These can only logically happen at the end of one coining year and the beginning of another. A previously struck dime (1998) gets stuck in a hopper trap door and then the hopper is filled with planchets destined to be struck by the upcoming new year dies (1999). So it appears this rare combination of errors can only happen at the years end and if all the error circumstances are right!

There are only approximately twenty known for all dates & denominations for dual dated specimens. Normal double denomination errors with the “same” date, number approximately 900-1200 known. That’s a 45 to 60 to ONE “1” ratio.. Same date Double denominations currently costing from \$800 - \$1,100.

You do the math! 60 x \$1,000. Hmmm! Sounds like today’s prices of \$6,000-10,000 are pretty cheap. There are about 10-12 “U.S. Mule” errors known that cost \$75,000 - \$125,000 each. Now consider the rarity of these dual dated double denomination errors. Lots of room for growth here, especially in the direction that the error market has been heading, UP!

Chile and Costa Rica Errors

Chile and Costa Rica Errors

Washington Error Coins.com

Welcome to Washington Error Coins!

This website is dedicated to the 2007 Washington Dollar Coins released with missing edge lettering errors.

In 2007 the U.S. Mint began producing the first coin in the new Presidential Dollars series and a small number of coins were accidentally released without the usual lettering on the edge. This is a very RARE ERROR that quickly became known as the "Godless" coin because "In God We Trust" was part of the missing inscription on the edge of these coins.

Visit our website to read more about these rare "Godless" coins...

We were fortunate to secure a very limited number of Washington Error Coins. Remember there are not many of these phenomenal error coins available. This is a rare chance to own the most talked-about error coin in generations. But please don't wait -- YOU MUST ORDER NOW! Quantities are limited and prices will go up!

Unique Fold-Over Clock

by Fred Weinberg (fredweinberg.com)

This fold-over clock represents the only known clock of twelve fold-over Cents. Each was struck folded-over in one of the twelve positions. It includes one that is double struck and many that are struck in copper. It is unique and one of the more exciting mint error sets that I have ever handled.

Washington Dollar Missing Edge Lettering Mint Errors

by Eric Dennis

My numismatic adventure began on a Sunday evening in late February 2007. I happened across a Craigslist ad for a few odd coins for sale. I investigated further and then decided to call the number in the ad. As it turns out the seller was a bank teller and she had just purchased these strange coins at her branch on Friday morning. Through our conversation I was able to learn all about the just released Washington Presidential dollars with the new edge lettering, and much more importantly, the ones that were missing the edge incused lettering that she had been finding at work.

Even though I was a newbie to the coin collecting world, I had always been fascinated with error coins. I remember being in grade school 30 some odd years ago and picking up a book on coin collecting in the library. In this particular book they pointed out that if an error coin (they called them Fido's) made its way into circulation the value would usually be dramatically increased just by the fact that it had a mistake on it. From that point forward I had always dreamed of finding a rare error coin.

I was immediately set into action when I found out

Washington Dollar Missing Edge Lettering Mint Errors

there could be more of these coins available locally and I was up at the crack of dawn and in the car on my way to my local bank. Fortunately I had just sold a couple of used motorcycles the week before, so I had ample cash on hand to go out and purchase about 12,000 of these new coins and sort through them all for the errors.

I arrived at my bank's drive-thru a few minutes before they opened and I thought to myself, how am I going to get them to sell me all of these coins. When the teller came to the window I asked if they had the new dollar coins. She said they did and asked "how many would you like?" I said "I'll buy all that you will sell me." She gave me a sort of confused look then produced about 30 rolls of the new coins from under her counter. I promptly purchased them all and drove to the nearest parking spot to inspect them. I felt like Charlie opening his first Wonka bar in search of the golden ticket as I opened the first roll, carefully peeling back the paper, only to notice nothing but edge lettering on all of the coins in the roll. I opened 4 or 5 more and they were all the same. I had a feeling immediately that if a few of the rolls in a given branch didn't contain the errors then none of them would.

On to the next bank to try again, and similar to the first one, I received a bewildered look followed by the handing over numerous bags of rolled coins. Again I checked through them only to find all normal coins.

Then I went to an Amsouth bank next (now called Regions bank) and the lobby was now open so I walked up to the teller and asked to purchase the new coins. Unfortunately this bank's policy on selling the new dollars was not as liberal as the previous ones. The teller only agreed to sell me 3 rolls, so I took them and returned to my car once again hoping to find the elusive error coins. As I opened the rolls the smooth edged coins in the roll stood out in stark comparison to the ones bearing the normal lettering, it was an incredible rush! I just paid \$75 for 3 rolls of 25 coins that contained at least 15 errors total. At this point in time they were selling for around \$300 - \$400 and I am thinking that I have thousands of dollars worth of coins in my hands and rightly so!

At this point I enlisted every person I had available to relieve this branch of its golden toned booty. My wife and some of my friends went into the branch and exited with 2 rolls each. At this point I am really getting excited about the prospect of this whole thing, but convincing the others to abandon work and join in on my soon to be 3 day saga was not in the cards. Another one of his wild schemes they no doubt thought. Could I blame them? My track record on investments and such was pretty lackluster up until this point. I however knew the significance of this find and would not be deterred, so off I went, blackberry in hand, mapping out every Amsouth location from St. Augustine to Jacksonville Florida.

Every branch was different, some would just sell all the coins they had without question, and others wouldn't sell me any due to the fact that I was not a banking customer. That soon changed as I opened a brand new Amsouth account at one particularly helpful branch.

The next stop I made was at the local grocery store. Now I am armed and delicious, and taking aim at troublesome tellers with cheesecakes, pies and cookies of all sorts! If they would only sell 2 rolls of Presidential Dollars to me, a loyal Amsouth customer, how many would they sell to a man with a cheesecake in one hand and a roll of hundreds in the other? The answer was in most cases, almost all or all of them! When the treats were ineffective I was still able to convince some concerned tellers to sell me their coins by trading out some of the rolls I had purchased earlier from locations not containing errors, so they would still have dollars to offer to their adoring public.

Washington Dollar Missing Edge Lettering Mint Errors

I set out for home that night after the last bank had closed and I noticed that my vehicle was actually leaning to the right from the weight of the coins on the passenger floorboard and seat! I arrived home and immediately set up a workstation at the dining room table and began the sorting process. The amount of errors per roll generally averaged 10% - 15% in almost every roll. The odd roll would have only 1 or 2 errors and a few had as many as 7 or 8.

After a long but exciting night of careful sorting I set back out early in search of more locations. I changed to a faster car too. This actually helped me out more than just being quicker around town, because I was able to revisit a few of the same drive thru's from the first day without being noticed.

The second day actually netted more than the first because I did not waste my time with the non error bearing banks. The third day consisted of me turning

in several thousand of the normal coins to my bank to get some much needed capital and resume hunting. They were quite confused about this action and I did not tell them much, just please and thank you. They understood a little better a month later when I started making large deposits and making frequent trips to the safety deposit boxes.

I was able to find a few pockets of coin here and there on the third day but for the most part they had been bought out. Some banks had a lot of loose dollar coins to offer that had been returned for some odd reason, but very few locations had whole unmolested rolls left.

I have a limited amount of these coins for sale on my website: <http://WashingtonErrorCoins.com>.

You aren't just buying any error coin, you are buying one with a great story behind it!

NGC Certifies 2008 Monroe Dollar Edge Lettered Planchet

by Mike Byers

NGC has just certified a 2008-P (James Monroe) Presidential Dollar blank planchet with the lettered edge. This is the second one known dated 2008. It was submitted to NGC by Garrett Reich. The other blank planchet dated 2008 with the lettered edge was reported by Coin World in their March 17th, 2008 edition. It was discovered by Ken Sigler, owner of Cinnaminson Rare Coins in New Jersey, who plans to have it certified by PCGS.

The edge is inscribed with the mottos, date and mintmark. The photos below are courtesy of Garrett Reich and show the edge lettering. He discovered this blank planchet in a box of James Monroe Presidential Dollars.

I suspect that only a few will be discovered that are dated 2008. Major mint errors in the Presidential Dollar series are very rare and are highly prized by collectors.

1798 Large Cent First Strike Brockage Sells For \$27,600

Editor's Note: From the Heritage Galleries auction listing:

1798 1C Second Hair Style--First Strike Brockage Reverse--AU50 PCGS. Obverse die of S-165, 166, and 167. The Second Hair Style with a Large 8 in the date. Only one obverse die was created with the combination of these features. Sheldon nicknamed the obverse the "Whisker Variety" for a tiny die chip on the lower edge of the chin, visible on both the normal image and the brockage image of this piece. It is a spectacular piece with medium brown surfaces and extraordinary eye appeal.

Attempting to narrow the variety choices is a fine numismatic pursuit. Working backwards, S-167 always comes with an obverse die crack through the 8 in the date. The present example has no obverse die cracks, so S-167 is eliminated. There is no bulge behind the low curls, as it appears on State III of S-166. Faint clash marks at Liberty's throat are seen on States I and II of S-166, and States II and III of S-165, and those are the choices. We feel strongly that this example is S-165. EAC 40.

Triple Struck 1891 \$5 NGC Proof 64

From the Heritage Galleries Auction Listing: 1891 \$5 -- Triple Struck with Reverse Rotation--PR64 Ultra Cameo NGC. This rare proof half eagle was struck at least three times by the dies. Of course, all proof Liberty fives were multiple struck, to bring out complete definition. What makes the present piece an error is that the hammer (reverse) die was apparently loose, and rotated a couple of degrees between strikes. The anvil (obverse) was stationary. As a result, the obverse shows no evidence of a multiple strike, but the reverse has faint rotated impressions from the prior two strikes. These are most apparent above the eagle's right (facing) shoulder, and southwest of the eagle's beak. For the final strike, the dies were close to medal turn. The devices are fully frosted, and contrast greatly with the darkly mirrored fields. Hair-thin field imperfections near the date, star 10, and the neck curls are all that limit the grade. A mere 53 proofs were struck, and perhaps half that number have survived. The NGC and PCGS population data are undoubtedly inflated by resubmissions over the past 22 years. Census: 4 in 64 Ultra Cameo, 9 finer (1/08).

Triple Struck 1891 \$5 NGC Proof 64

CONECA

The Combined Organizations of Numismatic Error Collectors of America

CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit conecaonline.org and enjoy!

CONECA Variety Attribution Services

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

CONECA Error Examination Services

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

Terms and Conditions

We are offering this service for error collectors and dealers alike. In order to post your item on our website you must agree to the following terms and conditions.

1. All major U.S. mint errors are accepted if they are certified by PCGS, NGC, ICG or ANACS.
2. The approximate value of each item must exceed \$5,000.
3. Each item must meet our inventory criteria in terms of desirability and market value.
4. Byers Numismatic Corp charges a 10 % commission for each sale.
5. The minimum time for any listing is thirty days.
6. Seller agrees to a seven day return privilege from date of receipt.
7. Seller agrees to use an escrow service if requested by the buyer.
8. We reserve the right to deny or cancel any listing at any time.
9. All listing are subject to prior sale.

Please do not offer us the following:

1. More than two coins bonded together.
2. Caps more than ½ inch high.
3. U.S. Errors that were obviously and intentionally struck as error coins. No impossible mint errors.
4. We only accept consignments of U.S. Errors that were legitimately released through normal distribution channels.

Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a Mint Error collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at mike@mikebyers.com.

Mint Error News Price Guide

- Entire Price Guide Updated 5/1/08 -

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

Proof Errors

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,500 - \$2,500	\$2,000	\$4,000	\$1,500 - \$3,000	\$750
Proof Jefferson Nickel	\$2,500 - \$4,000	\$4,000	\$6,000	\$2,000 - \$5,000	\$1,000
Proof Clad Dime	\$3,000 - \$5,000	\$4,000	\$6,000	\$2,500 - \$5,000	\$1,250
Proof Clad Quarter	\$4,000 - \$5,000	\$5,000	\$10,000	\$7,500	\$1,500
Proof Clad Half	\$5,000 - \$7,000	\$4,000 - \$5,000	\$10,000	\$10,000	\$2,000
Proof Ike Dollar	\$10,000	-	\$20,000	-	\$4,000
Presidential Dollar	-	-	-	-	1 Known (Madison)

Mint Error News Price Guide

Broadstrikes

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

Denomination	(Small) XF/AU	(Small) Unc	(Large) XF/AU	(Large) Unc
Large Cent	\$150	\$300	\$400	\$1,500

Mint Error News Price Guide

Partial Collars

Partial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

Uniface Strikes

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Bonded Coins

Bonded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Coins Struck on Feeder Finger Tips

After a recent tour of the U.S. Mint in Philadelphia, it was discovered that the minting process had changed to some degree. One of the changes was that “feeder fingers” were used during the striking of all denominations of U.S. coins. Prior to this tour, U.S. coins that were struck on feeder finger tips were authenticated and described as being struck on aluminum scrap. Coins from all modern denominations have been discovered that were struck on the tips of these feeder fingers.

Struck Fragments

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Mated Pairs

Mated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Transitional Errors

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

U.S. Gold Errors

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center

Indents

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

Die Caps

Die caps are caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

Die Adjustment Strikes

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

Double Denominations

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

Brockages

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

Double & Multiple Strikes

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

(Since each double and multiple strike can vary from being 10% off-center to 90% off-center, the prices listed below can be substantially more based on the percent off-center and dramatic overall look.)

Off-Center Strikes

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Off-Metals

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Counterbrockages

A counterbrockage error involves a cap die and a previously struck coin. When a cap die strikes a previously struck coin, the obverse design from that struck coin will be impressed into the cap. The result will be a design where the cap face will be an incuse brockage. When a new blank is struck by this cap die with an incuse brockage image, the obverse will have a raised and spread image from that incuse design of the cap. This brockage impression is known as a counterbrockage.

Fold-Over Strikes

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.

Denomination	AU	AU Dated	Unc	Unc Dated

Martha Washington Test Pieces

There is one set of a Dime, Quarter and Half struck by Martha Washington dies that are permanently housed in the Smithsonian Institute, embedded in blocks of lucite. According to United States Pattern and Related Issues, by Andrew W. Pollock III, “the only trial pieces purported to have survived metallurgical testing in 1965 were the Dime, Quarter Dollar, and Half Dollar equivalent strikes in copper-nickel clad over copper.”

Mike Byers’ discovery of the Martha Washington Test Piece on a copper-zinc Cent planchet struck 10% off-center with a uniface reverse was a front page Coin World article on August 7th, 2000. In a response to the Martha Washington Test Piece that he discovered, the Mint announced that “the dies are available to the Mint’s metal and blank vendors for testing.”

Denomination	Unc	Choice	Gem
Martha Cent	\$6,000	\$7,500	\$10,000
Martha Nickel	\$7,500	\$10,000	\$12,500
Martha Dime	\$20,000	\$30,000	\$50,000

Missing Edge Lettering

A mint error has recently been discovered on the new Presidential Dollars. These coins inadvertently left the United States Mint without edge-lettering on them. The inscriptions 'In God We Trust,' 'E Pluribus Unum,' as well as the mint mark and year are absent from these errors.

The Jefferson Dollar Missing Edge Lettering discovery coin sold on eBay for \$4,050.00 and was certified MS 65 by PCGS.

It recently re-sold on eBay for \$4,500.

(Prices as of November 1, 2007 and are for certified pieces by PCGS and NGC)

Mike Byers is the Publisher & Editor of Mint Error News Magazine

1981 Mint Error Catalog

Editor's Note: Here is another in a series of Mint Error Catalogs from Fred Weinberg when he was with Numismatics, Ltd. It is always exciting to compare current mint error prices with those from decades ago. Mint Error News Magazine thanks Fred Weinberg (fredweinberg.com) for sharing these with our readers.

COINLINK™

Your Source for Daily Numismatic News and Resources on the Web

Search:

CoinLink operates on one simple principle....

To provide the numismatic community with access to the “best” numismatic information, news and resources on-line.

CoinLink® was started in 1995 by Anteater Design Group Inc., and is headquartered in Longwood, Florida (just northeast of Orlando).

For over 12 years we have been proud to operate the most popular and comprehensive numismatic directory on the web, referring collectors to thousands of numismatic sites, and providing unbiased access to resources that are informative and relevant to collectors and dealers alike.

The reason for our success has been a willingness to listen to our users suggestions and provide innovative solutions to aggregating the diverse and ever changing sources of numismatic information available.

CoinLink does not buy or sell coins. We have NO commercial or financial interest in any company that does. We do NOT compete against our advertisers.

Rather, our goal is to provide a platform from which dealers and collectors can find each other and stay informed about what is happening within the marketplace and within the hobby.

As we move into our 12th year of operations, we want to thank all of the users, supporters and sponsors who have made CoinLink what it is today, and who continue to shape the direction in which CoinLink will grow in the future.

Scott Purvis - President
Anteater Design Group Inc.

ERROR WORLD

Join the *hottest*
Error Coin Club on the Net!

e r r o r w o r l d c l u b . o r g

The Error World on-line coin club exists for the purpose of advancing the knowledge and the field of error coin collecting.

Error World is dedicated to the promotion, discussion and dissemination of facts and ideas about error coinage, both domestic and world-wide.

Error World exists as a vehicle to bring collectors of both foreign and domestic error coinage together in a professional and relaxed atmosphere where they can exchange information, display photos and engage in lively debate about error coinage.

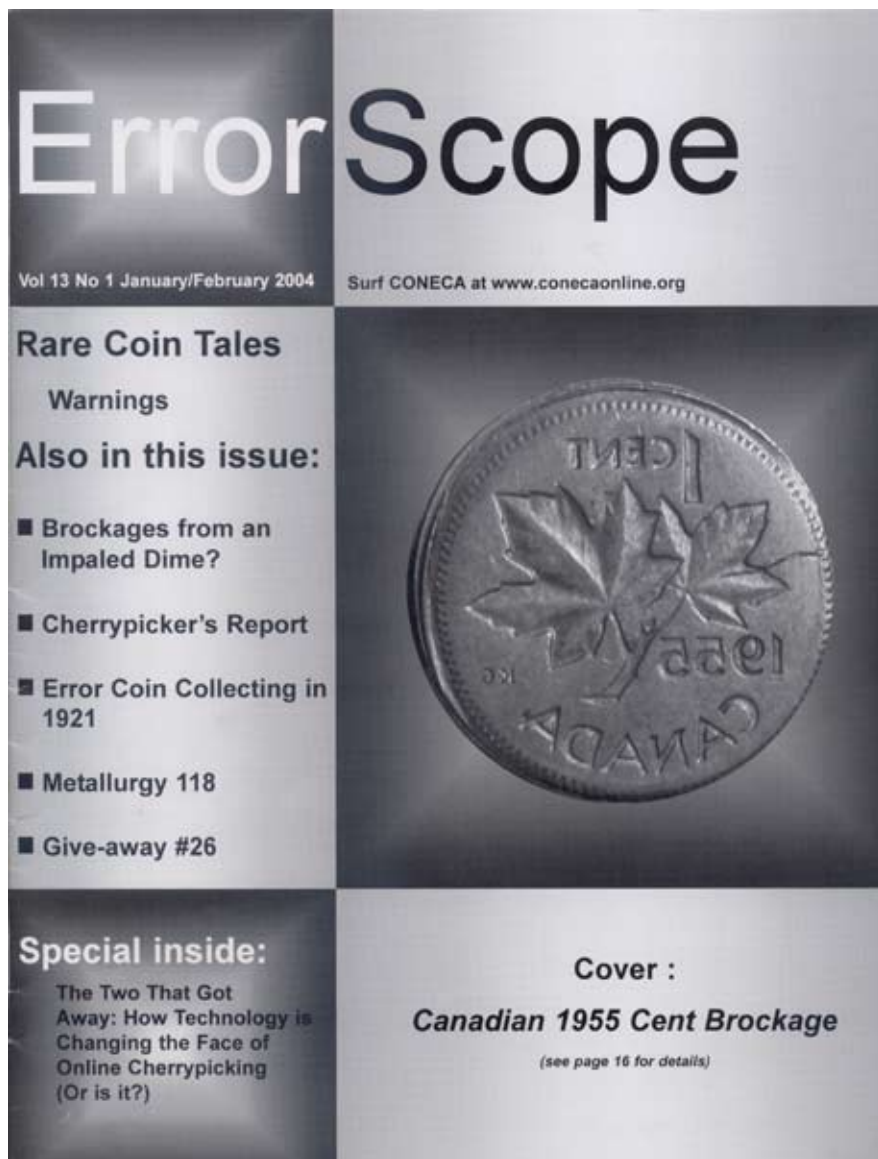

Error World is a non-profit organization with all revenues being put back into the club to provide improved services to the members of the club.

Error World will, from time to time, accept contributions from designated Patrons in the form of contest prizes, and/or cash to be used to defray club expenses.

Error World will, from time to time, attempt to obtain sponsors from the numismatic field who will bring price saving offers to Error World members.

Fred Weinberg & Co.

Dealer in Major Mint Error Coins & Currency

fredweinberg.com

BUYING MAJOR ERROR COINS & CURRENCY

If you have a single major mint error coin, either a recent issue or an older type coin, or 1,000 Off-Center Cents, please contact us. We stock over 60,000 Major Mint Error Coins and constantly need to purchase Major Error Coins for our clientele (please note that we do not deal in or buy Die Varieties, Damaged Coins, Doubled Dies, Filled Dies, or Die Cracks).

We do buy Major Mint Errors - such as Off-Center, Off-Metals, Double Strikes, Clad Layers missing, Die Caps, Double Denomination, etc.

Because of the many differences in each Error Coin we request that you send scans of your coin(s) to us for our examination and firm offer.
