# MINT **ERROR** NEWS<sup>TM</sup> MAGAZINE

Bringing the latest mint error news to the collector.

Mike Byers, Publisher & Editor Welcomes You!

Welcome to Mint Error News Magazine, bringing the latest mint error news and information to the collector. This is our third year bringing you both a print magazine and an on-line PDF magazine filled with articles, features and discoveries of major mint errors (striking errors) from the United States and around the World. Minterrornews.com has become one of the most popular and informative Internet resources for mint errors and is read by thousands of dealers and collectors.

Two major Mint Error News sponsors are Mike Byers and ANACS. Mike Byers is the Publisher and Editor of Mint Error News Magazine.

Mike Byers (mikebyers.com) has been a Professional Numismatist since 1978. He specializes in U.S. and World errors, and is now the largest dealer of the world's rarest mint errors. His new discoveries of major mint errors has been front page news for years. Mike Byers is also a Consultant for ANACS for Mint Errors.

ANACS is one of the three major grading services. They have been authenticating, certifying and encapsulating mint errors since 1991 which is years longer than the other two grading services combined. ANACS is highly respected in the Numismatic Community and has extensive experience in authenticating mint errors.

Two other sponsors to minterrornews.com are Tim Bullard (errorcointrader.com) and Allan Levy (alsocoins.com). Because of their combined experience and insight of the error coin market, they will bring valuable news and information to minterrornews.com.

Additional sponsors are CoinLink, CoinFacts.com, errorworldclub.org, Eureka Trading, uspatterns.com, Northeast Numismatics, Robert L. Astrich and The Software Clinic. We encourage collectors and dealers to submit articles and photos of major mint errors that we may feature on the website.

# Unique Pair of 1806 Draped Bust Quarters Obverse & Reverse Brockages

by Mike Byers (mikebyers.com)

These two mirror brockages of 1806 Draped Bust Quarters are spectacular and are among the rarest U.S. type errors that I have ever handled. I just purchased these from a old time mint error collection and was very pleased since it took months of negotiations to buy them. PCGS just certified them and I am proud to offer them for sale since they have not been available for decades.

They are unique and the only known brockages in the Bust Quarter Series (1796-1838). These are the earliest known brockages on any U.S. Silver denomination. The obverse brockage was matched to the reverse die of the 1806 B-2. The reverse brockage was matched to the obverse die of the 1806 B-1 (1806/5 overdate).

Fred Weinberg, the mint error authenticator for PCGS, examined and authenticated these two brockages. He stated that “this pair of 1806 Draped Bust Quarters is unique, spectacular, incredible and has not been seen in 25 years.”

For comparison purposes, although not in the same class as the two Draped Bust Quarter brockages, the only early U.S. Silver brockage

that even comes close is a Cap Bust Dime Brockage that sold for \$20,700 in the Bowers and Merena Auction of the Logan Collection. It subsequently graded VG at NGC and is being offered for considerably more. These two brockages are from an early and rarer series, are larger denominations, are graded considerably higher and are unique for the series.

There really is no U.S. early type coin mint error that compares to the rarity, status, importance and excitement of this unique pair of Draped Bust Quarter brockages.

# Heritage to Auction Part Two of the Larry Rausch Collection of Error Coins at FUN 2005

Additional selections from Larry Rausch's superb collection of nineteenth and twentieth century error coins will be auctioned in Heritage's upcoming FUN Signature Auction, to take place January 12 to 15 in Fort Lauderdale. Heritage offered Part One of the Rausch Errors at the recent Pittsburgh ANA Signature Auction. These are the first coins Mr. Rausch has ever sold in a lifetime of collecting.

"Mr. Rausch started collecting at the age of ten, in 1958," noted Heritage President Greg Rohan. "His father was a vest pocket dealer during the 1960s, and as might be expected of the times, invested heavily in rolls, many of which Mr. Rausch still holds. Every week he searched \$50 in cents gathered from parking meters, with several finds nice enough to be mentioned in *Coin World*. Through his high school years, he accompanied his father to many small shows in the Midwest. He noted the occasional error coin at these shows, and his collection started when he traded with his father for a group of 31 Liberty Seated Dimes (purchased for \$34.10 from a collector). Incidentally, he still owns those Liberty Seated Dimes."

Larry Rausch's collection of error coins covers obsolete types ranging from Early Quarters and Half Cents to Buffalo Nickels and Mercury Dimes. Many collectors search for years for the kinds of dramatic errors seen in this collection without much success. Perhaps the oddest coin is in Part Two of his collection is an 1856 Three

Cent Silver Stuck Over a European Taler. This is a very curious coin with a barely visible date, yet the obverse star is reasonably clear. The design elements of the Taler undertype are clear, with TALER and an oak leaf present on the obverse, while the reverse sports the partial word WAR with an O to the right on the lower portion of the Three Cent Silver design. A curious piece like this can become a great coin to study and show off.

Another truly fascinating coin is a 1923-S Standing Liberty Quarter, graded AU58, and struck 25% off center toward 10 o'clock on the obverse. Standing Liberty Quarter errors are rare to begin with, and to find this combination of a dramatic error and high grade on a key date coin makes it even that much more desirable. The coin has no signs of toning, remaining silvery-white with some luster in the fields. The date is drawn heavily by the off-center striking, but it is obviously a 1923-S. Liberty's shield is sharply struck, but her head is not present.

The Larry Rausch Collection includes coins of denominations and types ranging from Half Cents to Morgan Dollars, with the types of errors ranging from off-center strikes to wrong planchets. Connoisseurs of error coins will find a wealth of material in this collection to fit their interests.

## Other highlights of the Larry Rausch Collection include:

Catalogs for this auction will be available in mid-December. To purchase a catalog, please contact Nicole Jewell, 800-872-6467, 3500 Maple Avenue, 17th Floor, Dallas, TX, 75219.

# Barber Half

## Full Obverse Brockage

by Mike Byers (mikebyers.com)

This is one of the most spectacular major mint errors that I have ever had the pleasure of handling. It is a unique first strike full mirror brockage Barber Half. It is the only known Barber Half brockage for the entire series. It is almost uncirculated with original luster and beautiful toning.

This show piece mint error has traded between many dealers and collectors in the last 30 years. Every time it exchanges hands it causes a stir and draws attention among mint error enthusiasts. It was originally purchased by Steve Estes in 1972, who is a coin dealer in Oregon. When Steve bought the piece he was told that it was kept in a small leather pouch for almost 50 years. The person who sold it to Steve was a teller at Caliente Race Track in Tijuana, Mexico in 1926.

In 1976 Harlan White, another coin dealer, purchased this unique mint error as part of a large collection. It subsequently traded hands and was purchased by Fred Weinberg. At one point in time David Lawrence, author of *The Complete Guide to Barber Halves*, also had the pleasure of buying and selling this piece. Robert Astrich, a coin dealer from Hempstead, Texas, also handled it and wished he had kept it for himself.

It eventually became part of the Jerry Bobbe collection, who is a professional numismatist from Oregon. In 1997 Jerry Bobbe sold this piece to another dealer who offered it to me at the 2002 New York ANA. I was given the first opportunity to buy it from him. Having heard about this famous and unique mint error trading hands many times over the last quarter century, I immediately purchased the coin on the spot.

This Barber Half brockage is graded AU 58 by PCGS. Since it is an obverse brockage there is no date, but it was struck at the San Francisco mint. It is struck on a planchet that has extremely smooth surfaces, no distracting marks of any kind, original mint luster, reflective fields and original golden brown toning.

Since this was a first strike full mirror brockage mint error, the brockage is extremely deep, not distorted and was struck completely centered on the planchet without expanding beyond the collar.

**THE COMPLETE  
GUIDE TO  
BARBER  
HALVES**

By David Lawrence

**ERROR COINAGE**

All major errors of Barber halves are very scarce. Shown here are two of the more spectacular ones. The first, a full brockage half from the San Francisco Mint (shown at right), is believed to be unique. The coin has no obverse. In its place is an incuse mirror-image of the reverse because the reverse of another coin acted as the die. This half was purchased by Oregon coin dealer Steve Estes in 1972 at Lyle Clark in San Diego. It had been received in change by a teller at Caliente Race Track in Tijuana, Mexico in 1926. Bets were 50 cents at that time and supposedly it was the bettor's last half dollar, taken from a special place in his wallet. The teller was nearly 90 when he sold it to Steve and had kept it in a small leather pouch for the 46 years. The coin was sold to dealer Harlan White in 1976 as part of a large deal and has since passed through a number of hands (including the author's.) It is currently owned by Sharon and Jerry Bobbe, professional numismatists from Oregon, who vow they "will never sell it." The Bobbes kindly lent the coin to be photographed.

# “Around The World”

- Updating Activity In and Around Error World Groups -

by Jim Archibald - EW Founder

Error World Groups continue the steady growth and coin collecting is still a hot topic as this goes to press. The current statistics for EW Groups as of 12/01/04 are as follows...

EW1 - Error World - 113 members  
EW2 - Error World 2 - 508 members  
EW3 - Variety Coins - 266 members  
EW4 - U.S.Coin Collecting - 624 members  
EW5 - World Coin Collecting - 193 members  
Total - 1,704 Error World Members

The Holidays are now upon us, and I hope everyone has had a great time. By the time this issue goes out, it will be time for the big F.U.N. show in Florida. I would like to invite readers to join us live on-line. EW Groups covers most areas of collecting and we have some of the leading numismatists around in our various sites. Join us and see if you like it! We're 100% free and we intend to stay that way!

Recently, there has been lots of talk about doubled dies. Yes sir, these variety coins that are no longer supposed to happen. Well, I'm very happy to announce that they do. In fact, two of our members are now in the history books for discovering some of these modern 'single press' doubled dies. Gabe Alonzo who discovered a major example of the new Peace Nickel doubled die and Duane Smith who has found several doubled die reverse 2004 Lincoln Cents. You go guys! Make us proud! "Smitty" has also generously donated one of his finds to EW which will be raffled off totally free before Christmas to one lucky member. One of his coins recently sold on eBay for over \$250.00! Not too bad for a one Cent investment.

Our 5th Anniversary celebration was a great success and I want to thank all our members for making EW Groups the best place for coin collectors today! I'm looking forward to seeing you here sometime soon!

# Buffalo Nickels on Cent Planchets

by Saul Teichman (uspatterns.com)

One of the things that hinders error collecting, in my opinion, is the lack of knowledge regarding just how rare certain popular collectibles are. In previous editions, I have listed the examples known to me of Shield nickels on cent planchets and Liberty nickels on cent planchets. I have since begun to track at a high level the number of buffalo nickels on cent planchets.

So far, I have seen the following dates.

- 1918 About a half dozen known*
- 1918-S HIM 11/82 sale*
- 1919 About a dozen known*
- 1919-D Bolt*
- 1920 About 1 ½ dozen known including one 40% off-center ex Rausch-Heritage 8/04, Byers – PCGS64BN*
- 1924 Federal Brand sale*
- 1925 1) Weinberg 7/04 Inventory PCGS61BN*  
*2) Byers NGCVG08*
- 1929 64 ANA*
- 1934 1) Weinberg 3/02 FPL, Saul Teichman - NGC62BN*  
*2) Rausch-Heritage 8/04, Saul Teichman – PCGS63BN*  
*3) Byers 10/04 – ANACS63*  
*One of these ex 64 ANA*
- 1935 Bolt*
- 1936 81 ANA - XF (mintmark area not on planchet so could be a 36-D)*
- 1936-D B/R 3/02 as ANACS-AU55, Heritage 7/02 now PCGSAU50*
- 1937-S Superior 9/98 to Tony Terranova - PCGSXF45*
- No Date Several known, Kagins had one well circulated.*

Obviously, this list is far from complete. This article is a call to all collectors of these pieces to tell the collecting fraternity just what is out there and possibly to build a condition census of these pieces. If you are willing to participate, please let me know what you have. I can be e-mailed at [saul.teichman@ey.com](mailto:saul.teichman@ey.com). All names will be kept confidential. The results and possibly the number of pieces out there will be published in a future edition.

# Martha Washington Nickel

by Saul Teichman (uspatterns.com)

The illustrated example is the first Martha Washington 5 cent piece to come onto the marketplace. It was offered as lot 899 in Superior's August 2004 sale.

Its existence confirms that the U.S. Mint has created these "token" dies in all currently minted denominations.

The Martha Washington design has been used by the Mint as an all-purpose test piece since 1965 when it was first used for testing the cupro-nickel clad sandwich alloy on most of today's coinage.

This discovery piece was struck from dies using the original 1965 design with the lettering close to the rims, Edward Groves initials under the portrait and on the reverse the tree touching the "A" in "Washington". To compare this die to the 1999 die, [click here](#).

It also represents some kind of enigma. To our knowledge, the Mint had not contemplated changing the alloy of the 5 cent piece. The piece is described by Superior as being struck in "cupronickel-copper composite metal", but, according to NGC, was struck on a standard nickel planchet.

We believe it was likely struck to test the Schuler coin press in the 1980s. As these dies were given by the Mint to outside contractors, it is not known whether this coin was struck inside or outside of the Mint.

We are hoping that additional information will be forthcoming now that the coin is available as to how many and what year they were struck.

Photo courtesy of Superior.

# 1918-S Standing Liberty Quarter Struck 13% Off-Center

by Mike Byers (mikebyers.com)

All Major Errors on Standing Liberty Quarters are extremely rare. Very few are known and they are considered to be among the most difficult series of U.S. type coins with major errors.

This early dated, San Francisco Minted Standing Liberty Quarter is struck 13% off-center. It is in choice mint state condition, has original Mint luster and is fully struck with the “full head” designation.

This is among the furthest off-center Standing Liberty Quarters known. This would be the highlight of any U.S. Major Mint Error collection or a showpiece of any Standing Liberty Quarter collection.

# 1876 Indian Cent Struck on a 3¢ Nickel Planchet

The standard weight for a 3¢ Nickel coin is 1.94 grams, with a tolerance of +/- 0.26 grams. Therefore, this rare off-metal is within the limit for a 3¢ Nickel planchet since it weighs 1.68 grams. There were no other similar weight planchets of the copper and nickel composition in use at the Philadelphia Mint in 1876.

Indian Cent off-metals are very rare. This mint error is sharply struck with very reflective fields. It is also a rarer date and is in gem mint state condition.

# **CONECA**

The Combined Organizations of Numismatic Error Collectors of America

**CONECA is a national numismatic organization devoted to the education of error and variety coin collectors. CONECA focuses on many error and variety specialties, including doubled dies, Repunched mintmarks, multiple errors, clips, double strikes, off-metals and off-centers -- just to name a few. It publishes an educational magazine, The Errorscope, which is printed and mailed to members bimonthly. CONECA offers a lending library, examination, listing and attribution services; it holds annual meetings at major conventions (referred to as Errorama) around the country, and offers auction services to its members. Please visit [conecaonline.org](http://conecaonline.org) and enjoy!**

#### **CONECA Variety Attribution Services**

CONECA offers two attribution services. One service enables members and non-members to send their coins directly to an authorized CONECA attributer. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins attributed by a CONECA attributer and then graded and slabbed by ICG.

#### **CONECA Error Examination Services**

CONECA offers two examination services. One service enables members and non-members to send coins to an authorized CONECA examiner who will return an opinion of each coin's error classification. The other service is offered through the numismatic grading firm of ICG and enables CONECA members and non-members to have their coins examined by a CONECA examiner and then graded and slabbed by ICG.

# **[conecaonline.org](http://conecaonline.org)**

# 1898 Barber Quarter Obverse Die Cap & Brockage

This is the only known obverse die cap in the Barber Quarter Series. It is very deep and barely fits in the PCGS holder. The reverse has a brockage of the obverse design. This spectacular major mint error is in mint state condition with attractive toning. It would be the highlight of a type coin collection, a Barber coin collection or a mint error collection.

# Draped Bust Dollar Struck 15% Off-Center

This Draped Bust Dollar mint error is well known in the numismatic community since it is the furthest off-center known. It was struck a full 15% off-center. It is attractively toned and was conservatively graded.

# Consign Your Coins to Mike Byers

## Terms and Conditions

We are offering this service for error collectors and dealers alike. The reason why we are doing this is to promote the error business through the world wide web and to connect error collectors with the coins they have been searching for. In order to post your item on our web site: [byersnc.com](http://byersnc.com), you must agree to the following terms and conditions.

1. All major U.S. mint errors are accepted if they are certified by ANACS, PCGS, NGC or ICG.
2. The approximate value of each item must exceed \$1000.
3. The minimum time for any listing is thirty days.
4. Seller agrees to a seven day return privilege from date of receipt.
5. Seller agrees to use an escrow service if requested by the buyer.
6. We reserve the right to deny or cancel any listing at any time.
7. All listing are subject to prior sale.

Please do not offer us the following:

1. More than two coins bonded together.
2. Caps more than ½ inch high.
3. U.S. Errors that were obviously and intentionally struck as error coins. No impossible mint errors.

We only accept consignments of U.S. Errors that were legitimately found or released thru normal distribution channels.

## Scanning Specifications

1. Scan both the obverse and reverse of the entire holder.
2. Scan with a resolution of at least 300 dpi.
3. Save the picture in jpeg format (jpg).

## Information Requirements

In addition to e-mailing a photo of your item, please include the following information:

1. Name, Address & Phone Number
2. E-Mail Address
3. Asking Price

After your item is listed, we will contact you by e-mail with any offers and questions. Once a price is agreed upon we will handle the entire sale for a 10% transaction fee, which includes all costs (eBay fees, grading fees, webmaster charges, postage and registration fees, insurance, paperwork, etc.).

If you have a Mint Error collection for sale or would like to sell your duplicates and do not want to consign your coin(s), we can purchase your entire collection outright. Please contact us at [mike@mikebyers.com](mailto:mike@mikebyers.com).

## Extraterrestrial Numismatics

[www.anacs.com](http://www.anacs.com)

ANACS is the Collector's Choice because we know what counts: knowledge, integrity, and service. How much we value coin collecting is evident in our work.

The ANACS team enthusiastically works to advance coin collecting by offering unequalled expertise and developing new services.

This makes ANACS the choice of hobbyists, professional numismatists, and dealers. We are the coin grading service to contact when you want to know all the details about your coin's authenticity and grading.

Collect with passion. ANACS

# Mint Error News Price Guide

This price guide is brought to you by Mint Error News. It has been compiled by many of the top major mint error dealers.

This price guide is a guide. Prices fluctuate due to the date, grade, eye appeal and how dramatic the striking error is. Rarity is also a factor. The price is sometimes based on the rarity and grade of the type of coin as well as how rare the error is. The price can also vary depending on whether two collectors are bidding for the same rare major mint error. When purchasing a mint error, it is important to use multiple resources to determine value, as there are many mint errors that do not fit into one category.

## Proof Errors

Proof coins are struck by technicians who hand feed the blanks into special presses. They are produced, examined, and packaged using extreme quality control. It is very unusual to find major proof errors. A few broadstrikes, off-centers, double strikes in collars and off-metals have been known to be found in sealed proof sets. Proof errors are aggressively sought after by many error collectors.

A very small group of Proof errors recently came from a collection that was auctioned by the State of California. The U.S. Secret Service inspected and released this collection to the State of California determining that it was legal to own. The State of California then auctioned the collection and it has been dispersed since the sale.

Denomination	Broadstrikes	Die Trials	Double/Triple Strikes	Off-Center Strikes	Partial Collar Errors
Proof Lincoln Cent	\$1,500 - \$2,500	N/A	\$4,000	\$1,500 - \$3,000	\$750

# Mint Error News Price Guide

## Broadstrikes

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

# Mint Error News Price Guide

## Partial Collars

**P**artial collar strikes occur when there is a malfunction of the striking press. This causes the collar to be in an incorrect position. The lower die (usually the reverse die) is recessed in the collar. This allows the coin which is going to be struck to have a formed rim. After a coin is struck the lower die raises upwards, pushing the struck coin out of the collar and ejecting it. If a blank entering the collar is not properly seated, it will only have partial reeding as it is struck. The edge of this coin will have a partial reeding and a partial blank surface area. Recently, the Mint has installed new machinery where either die can be installed in either position.

## Uniface Strikes

Uniface coins occur when there have been two blank planchets in the press at the same time. The other blank will obstruct the die on either the obverse or reverse side, which will prevent it from having that design on the coin. There are many different variations involving uniface errors. In addition to having a 100% blank obverse or reverse, a coin can be struck off-center, with a blank planchet in the collar which will obstruct one side of the off-center. There are also mated pairs which have a combination of multiple errors which can include a side which is uniface. Finally, there are uniface strikes due to a die cap which adhered to the die, forming itself in the shape of a die and striking blank planchets.

Denomination	Uniface Obverse XF	Uniface Obverse Unc	Uniface Reverse XF	Uniface Reverse Unc

## Bonded Coins

**B**onded coins occur when the feeder system, which supplies blank planchets to the coin press, malfunctions and jams. When this occurs, a struck coin is not properly ejected and another planchet is fed into the collar and is struck. This struck coin will land on top of the previously unejected strike. These coins will then crush and bond together. This may occur many times as more coins bond.

Denomination	2 Planchets	3-4 Planchets

## Coins Struck on Feeder Finger Tips

After a recent tour of the U.S. Mint at Philadelphia, it was discovered that the minting process had changed to some degree. One of the changes was that “feeder fingers” were used during the striking of all denominations of U.S. coins. Prior to this tour, U.S. coins that were struck on feeder finger tips were authenticated and described as being struck on aluminum scrap. Coins from all modern denominations have been discovered that were struck on the tips of these feeder fingers.

Denomination	Small	Medium	Large

## Struck Fragments

The blanking press takes the coils of metal strips and punches blanks out of it, ejecting the webbing at the other end. The webbing is cut into small scrap pieces to be melted and recycled. Occasionally a scrap piece will be mixed with the blank planchets and struck by the dies. Struck fragments are rare in the larger denominations. These can be uniface or die struck both sides and are very rare on type coins.

Denomination	Uniface	Die Struck Both Sides
Indian Cent	–	\$4,000
Lincoln Cent Wheat Ears	\$750	–

## Mated Pairs

**M**ated pairs involve two individual coins with different errors that were struck together at the same time. Mated pair error combinations can be found in most error types and come in many shapes and sizes. Mated pairs can be overlapped when one of the coins is struck off-center on top of another coin. Another type involves a brockage where a struck coin was perfectly centered on a blank and restruck. Some mated pairs involve a die cap where the cap and brockage coin are discovered together, but this is a scarce find.

The rarest mated pair type involves two die caps (obverse and reverse) where both dies were capped at the same time and both die caps are mated. This last type is extremely rare and there are only a few known examples of mated pairs involving an

obverse die cap and reverse die cap. There are several of these mated pairs known on Kennedy Halves including two dated 1976, which is the Bicentennial year. One of the most spectacular mated pairs involve two Barber Dimes, an obverse die cap mated to a reverse die cap and are unique.

Mated pairs can also involve an off-metal where a smaller blank planchet or smaller struck coin was struck on top of a larger coin. This type is extremely rare. The most spectacular pair known is a double struck Franklin Half which was mated to a Lincoln Cent. The Lincoln Cent blank was on top of the obverse of the struck Franklin Half. This pair was then struck together. It is unique.

Denomination	Overlapping	Full Brockage	Die Cap	2 Die Caps
Lincoln Cent Wheat Ears	\$1,000	\$1,500	–	–

## Transitional Errors

A transitional error occurs when a coin is struck on a planchet from a previous year with different metal composition. The most famous transitional is a 1943 copper cent struck on a 1942 copper blank. 1943 cents were struck in steel because of the copper shortage during World War II. Other famous transitionals include 1965 coinage struck in silver instead of clad.

There are also transitionals struck on blanks for the next year. An example is 1964 coinage in clad instead of silver. Most recently, transitionals were discovered involving the SBA and Sacagawea Dollars of 1999 and 2000. There are eight known 1999 SBA Dollars struck on the brass planchet for the 2000 Sacagawea Dollar, and four known 2000 Sacagawea Dollars struck on a clad planchet for the 1999 SBA Dollar.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc - Gem

## U.S. Gold Errors

Major mint errors on U.S. Gold coins are the most prized category of all mint errors. Gold errors are very rare and a few have traded in the \$75,000 to \$100,000 range. Even a broadstruck U.S. Gold coin can easily sell for \$15,000 to \$30,000 compared to a broadstruck Cent, Nickel, Dime or Quarter which all sell for well under \$10. Many serious collectors of Gold Errors have to wait patiently for months and sometimes even years to acquire that one special piece for their collection.

The prices listed here are for common dates in AU-Unc. Better dates and errors that are in gem condition are worth considerably more.

Denomination	Partial Collar	Broadstruck	Clipped Planchet	3% - 5% Off-Center	10% - 15% Off-Center

## Indents

An indent error occurs when two blanks are fed inadvertently into the same collar, with one blank partly overlaying on top of the other. When the hammer die strikes this combination, the upper blank will be forced into the lower blank, creating a depression which is shaped similar to the upper blank. A scarce type of indent occurs when a blank intended for one denomination lands on top of a blank from a different denomination.

## Capped Dies

A capped die is caused when a struck coin sticks to the upper hammer die. Once the coin is struck to the die face, the reverse of the struck coin becomes the new die face. When the next blank is fed into the collar and the strike occurs, the reverse design of the adhered struck coin impresses itself into the new blank. This struck coin is a brockage strike. The coin that adhered to the upper die is known as a die cap. This process repeats itself as more coins are struck by the cap. The greater the number of strikes, the higher the cap metal will be pushed around the upper die shaft. Eventually, the cap brakes away from the die in the shape of a thimble.

## Die Adjustment Strikes

Die adjustment strikes are also known as die trials. This error occurs when a coin is struck from the press with very little pressure. When the press is being set up and adjusted, extremely weak strikes occur as the strike pressure reaches its optimum level. These die trials are destroyed after being struck and are rarely found in circulation.

## Double Denominations

One of the most expensive, popular, and desired types of errors are the double denominations. This error happens when a coin is struck on a previously struck coin of a smaller denomination. Examples are a cent on a struck dime, and a nickel on a struck cent. The most dramatic are those with considerable design visible from the original strike. There are a few known double denominations with different dates.

## Brockages

A brockage error can only occur when there are two coins involved. One of the coins involved will always be a struck coin which has not ejected properly. That struck coin will find its way back between the dies and will be struck next to a blank planchet which was fed into the collar. The image of that first struck coin will be impressed into that side of the blank planchet. The result will be a second coin which has images of the first coin impressed into it. Those images will be pressed into the coin and the image will be in reverse. This incuse sunken image is known as a brockage.

## Double & Multiple Strikes

When a blank planchet is struck by the dies, the normal procedure is for the feeders to eject the struck coin out of the collar and into a chute. If there is a malfunction and the struck coin isn't ejected, it may receive a second or third strike by the dies. A multiple struck coin can happen in many ways and have many combinations of errors.

## Off-Center Strikes

Off-center coins are one of the most common and best known types of errors. This happens when a blank which is supposed to be fed into the press, lands in the collar improperly. When this occurs only part of the blank is between the upper and lower dies. When the dies strike the blank, only that part will be struck with a design.

Denomination	10% - 15% XF/AU	25% - 60% XF/AU	10% - 15% Unc	25% - 60% Unc

# Mint Error News Price Guide

## Off-Metals

Off-metal and wrong planchet errors occur when a correctly made blank from one denomination is accidentally fed into a press for another denomination. Examples are a nickel struck on a cent planchet and a cent struck on a dime planchet. The coin struck on an incorrect blank will weigh exactly what the denomination of that blank would have been. An even more dramatic wrong planchet error is a coin struck on a previously struck coin of a different metal.

Denomination	Off-Metal Planchet	Circulated	AU	Unc	Choice Unc – Gem
Indian Cent	Foreign Planchet	\$1,000	\$1,500	\$3,000	\$5,000
Indian Cent	Dime Planchet	\$7,500	\$12,500	–	–

# Off-Center Gold Crown

This mint error was submitted by Martin Wettmark, a collector of major world errors. It is a Gold Crown from Gibraltar of Queen Elizabeth II struck 5% off-center.

# uspatterns.com

The Society of U.S. Pattern Collectors is dedicated to the study of many of the rarest coins struck at the U.S. Mint: patterns, die trials and experimental pieces.

Saul Teichman's  
Want List

Saul.Teichman@ey.com

I am looking for the following off-metal errors:

Wartime Nickel on a Copper Cent planchet.  
Bicentennial Half on a Cent planchet.  
Bicentennial Half on a Dime planchet.  
Kennedy Half on a Sacagawea Dollar planchet - if it exists.  
Ike Dollar on a Cent planchet.

Ike Dollar on a Nickel 5 Cent planchet.  
Ike Dollar on a Dime planchet.  
Ike Dollar on a Quarter planchet.  
Sacagawea Dollar on a Cent planchet.  
Sacagawea Dollar on a Nickel planchet.  
Sacagawea Dollar on a Dime planchet - if it exists.

# Pair of Barber Dime Die Caps Obverse and Reverse

This is a unique pair of Barber Dime Die Caps. They are both from the New Orleans Mint which produced very few Mint Errors. The Barber Dime obverse cap is one of 5 known for the series. The Barber Dime reverse cap is the only known reverse cap for the series, making this the only known set.

The Barber Dime obverse cap is an extremely deep die cap and barely fits in the PCGS holder. The reverse of this cap is a distorted impression of what was the raised design of the reverse. This cap formed incuse brockages on the obverse of many Barber Dimes that were being struck.

The Barber Dime reverse cap is also extremely deep and has a brockage. The obverse of this cap shows an incuse brockage design of the reverse of a struck Barber Dime cap. The obverse of this cap created counterbrockages on the reverse of Barber Dimes that were struck. A counterbrockage is a brockage from a brockage and is a very rare Mint Error.

It is exciting to have a unique set of both Barber Dime obverse and reverse caps. In addition, they are from the New Orleans Mint and have somehow survived over a hundred years. Truly the centerpiece of a Mint Error Collection.

# 1795 Flowing Hair Dollar Two Leaves Variety Struck on Flawed Planchet

by Mike Byers (mikebyers.com)

Major Mint Errors on Flowing Hair and Small Eagle Silver Dollars are extremely rare. This choice Mint State Flowing Hair Dollar is of the rarer two leaves variety.

This piece is virtually as struck with razor sharp detail, full cartwheel luster, light original gold and orange toning and with no rub on either side. It was struck on a planchet with major flaws on both sides. This coin never should have been struck, instead the blank should have been melted.

This Mint State Flowing Hair Dollar is well known in the Numismatic Community and has an impressive pedigree throughout the decades.

It was in a major U.S. Type Collection which sold in a Lester Merkin Auction. It was

also sold by Abe Kosoff, one of the premier Numismatists of the twentieth century. Julian Leidman also purchased and sold this Dollar many years ago.

The wholesale Coin Dealer Newsletter Quarterly lists this rarer two leaves variety at \$30,000 in MS 60. This coin is severely undergraded and almost every Professional Numismatist who viewed this coin graded it choice Mint State 63. It appears to have been graded conservatively due to the planchet flaws on both sides. Since it is correctly attributed as a Mint Error, the planchet flaws should not have influenced the grading.

This unusual type of Major Mint Error is on a choice Mint State Flowing Hair Dollar with a great pedigree.

# 1855 Large Cent Obverse Die Cap

There are only a handful of Large Cent caps known. This obverse die cap is very deep and barely fits in the NGC slab. The reverse is very spread out and created brockages on many Large Cents.

This is a very dramatic cap and it is almost in mint state condition.

# 1866 5¢ J-517

## Double Struck Mule Pattern

by Mike Byers (mikebyers.com)

This pattern is a deliberate muling of two dies since each side has the inscription UNITED STATES OF AMERICA. The obverse die has the portrait of George Washington. The reverse is the regular die without rays, which was adopted in 1867 for the Shield Nickel.

This fascinating pattern muling was also double struck. There is a 5 degree rotation between the strikes on the obverse. The reverse shows a 45 degree rotation between the two strikes.

This is one of two known mulings of this pattern that are double struck. The other known example shows an 80 degree rotation on the reverse between the strikes.

There are many different Nickel patterns struck in 1866 using different die combinations. 1866 is considered one of the most fascinating years in the history of U.S. patterns.

# Double Struck Double Eagle

by Heritage Galleries & Auctioneers (heritagecoin.com)

This Double Struck Double Eagle was sold in auction by Heritage in their August 2004 Pittsburgh ANA Signature Sale. Here is the press release describing this incredible coin:

Dallas, Texas: One of just a handful of known double struck gold coins is being auctioned by Heritage at the Pittsburgh ANA convention, August 16-21, 2004. Heritage is the official auctioneer of the American Numismatic Association's National Money Show.

"This is a fabulous and incredibly rare error," noted Heritage Vice President Jim Stoutjesdyk. "This Double Eagle has been certified MS60PL and is classified as Double Struck by ANACS. It features an exceptionally bold strike and highly reflective, proof-like fields with some light hairlines, as is typically seen in this grade. The surfaces are extremely lustrous and the color is rich and full."

"Mint errors on United States' gold coins are very rare and in many respects are the *crème de la crème* of the error market," continued Stoutjesdyk. "It's been struck at least twice, with a visible slight rotation between strikes. As a result, there is prominent doubling on the date and the stars, along with Liberty's profile and hair. The doubling is also seen on the reverse, although to a less prominent degree than the obverse."

At least one major error and variety expert speculates that it was intended as a proof or as a trial strike of proof dies. Stoutjesdyk believes that "theories such as this only add to the mystery of the coin, and close inspection with a loupe rewards the viewer with prominent doubling on all of the obverse elements and invites one to form his or her own theory regarding its production."

He adds, "errors on United States gold coins are rare by the nature of their production, which included heightened quality control measures. Even insignificant errors on gold coins are prized by numismatists. It is truly an event when a major error such as this crosses the block. Recently, a 1904 Double Eagle certified by PCGS as MS63 Double Struck in Collar sold in a well-publicized private transaction for \$102,000." Attesting to the importance of this piece, Stoutjesdyk stated, "This is arguably the most important gold error that Heritage has had the pleasure of selling at auction. An error of this magnitude would surely be a highlight of any top collection and could be a centerpiece of a Double Eagle aficionado's cabinet."

# *The Cherrypickers' Guide* *To Rare Die Varieties* Volume Two, Fourth Edition

The Second Volume of the Fourth Edition of *The Cherrypickers' Guide* is just around the corner. We are now accepting prepublication orders at a 20% discount off the retail price. To place your order, please visit [www.cherrypickersguide.com](http://www.cherrypickersguide.com). Or send an e-mail to [jtstanton@aol.com](mailto:jtstanton@aol.com) for instructions, or write to J. T. Stanton, P. O. Box 15487, Savannah, GA 31416-2187.

There are three versions being offered for this volume. The standard 5.5" x 8.5" page size coil bound, the most popular version. A hard bound version with a 5.5" x 8.5" page size (available approx. November, 2003). There will also be a new, large format version available. The copy will be the same as for the 5.5" x 8.5", but will be printed on an 8.5" x 11" page. Again coil bound, this version will allow about 1.5" space on all 4 sides of the copy for notes, plus will include extra note pages within the book. Those who like to keep detailed notes of their collection and of new varieties will find this version the most accommodating.

Only orders placed with J. T. Stanton either by mail, fax or via the web site will be autographed and numbered. If you have a copy of Volume One which is numbered, please note your Volume One book number and your Volume Two will also have the same book number. Payment by check, money order or PayPal only.

5.5" x 8.5" Coil bound \$39.95

5.5" x 8.5" Hard bound \$69.95

8.5" x 11" Large format, spiral bound \$64.95

P & H is \$3.50 for the first copy, and \$1.50 for each additional copy.  
Mailing will be via Media Mail.

For mail orders, send check or money order to:  
(PayPal account is [jtstanton@aol.com](mailto:jtstanton@aol.com))

# Fred Weinberg & Co.

Dealer in Major Mint Error Coins & Currency

[fredweinberg.com](http://fredweinberg.com)

## BUYING MAJOR ERROR COINS & CURRENCY

If you have a single major mint error coin, either a recent issue or an older type coin, or 1,000 Off-Center Cents, please contact us. We stock over 60,000 Major Mint Error Coins and constantly need to purchase Major Error Coins for our clientele (please note that we do not deal in or buy Die Varieties, Damaged Coins, Doubled Dies, Filled Dies, or Die Cracks).

We do buy Major Mint Errors - such as Off-Center, Off-Metals, Double Strikes, Clad Layers missing, Die Caps, Double Denomination, etc.

Because of the many differences in each Error Coin we request that you send scans of your coin(s) to us for our examination and firm offer.

# NORTHEAST NUMISMATICS INC. RARE COINS · PERSONAL SERVICE

Northeast Numismatics  
10 Concord Crossing, Ste. 220  
Concord, MA 01742  
800-449-2646  
www.northeastcoin.com

Northeast Numismatics has an impressive inventory of over 1,200 U.S. and foreign coins. We have a strong selection of mint errors, both U.S. and foreign. And we carry every area of United States coinage from colonials through rare gold including type, commemoratives, silver dollars and much, in addition to our extensive inventory of world coins.

High quality “fresh” coins are what we are known for and take pleasure in offering. We constantly are hearing from our customers about our excellent prices and high customer service. 2003 is our 39th year of business, so order with complete confidence. Also, please keep in mind that we are always buying coins of all kinds, certified and uncertified, to fill our want lists.

# ERROR WORLD

Join the *hottest*

**Error Coin Club on the Net!**

**[errorworldclub.org](http://errorworldclub.org)**

The Error World on-line coin club exists for the purpose of advancing the knowledge and the field of error coin collecting.

Error World is dedicated to the promotion, discussion and dissemination of facts and ideas about error coinage, both domestic and world-wide.

Error World exists as a vehicle to bring collectors of both foreign and domestic error coinage together in a professional and relaxed atmosphere where they can exchange information, display photos and engage in lively debate about error coinage.

---

Error World is a non-profit organization with all revenues being put back into the club to provide improved services to the members of the club.

Error World will, from time to time, accept contributions from designated Patrons in the form of contest prizes, and/or cash to be used to defray club expenses.

Error World will, from time to time, attempt to obtain sponsors from the numismatic field who will bring price saving offers to Error World members.

Mike Byers is the Patron of [errorworldclub.org](http://errorworldclub.org)

# Frequently Asked Questions

---

## What are broadstrikes?

A broadstruck error occurs when a coin is struck without the collar to form the rim and edge that is part of the shape of the coin. Coins can be broadstruck on either type one or type two planchets. When a coin is broadstruck the blank being fed into the collar will spread and distort outward as it is being struck because the collar isn't in the correct position to retain it.

# Frequently Asked Questions

---

## What are fold-over strikes?

A fold-over coin is one of the most dramatic types of errors. It occurs when the blank is standing vertically between the dies. During the strike, the force is so great that it bends and folds the blank. These fold-overs can be on-center or off-center, and come in many different shapes. There are a few fold-overs with multiple errors, either with an additional strike or fold-over. Denominations above quarters are very scarce.
